QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED: JUNE 30, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM _____ TO _____

COMMISSION FILE NUMBER: 1-33796

CHIMERA INVESTMENT CORPORATION

(Exact name of Registrant as specified in its Charter)

MARYLAND
(State or other jurisdiction of incorporation or organization)

26-0630461
(IRS Employer Identification No.)

1211 AVENUE OF THE AMERICAS, SUITE 2902
NEW YORK, NEW YORK
(Address of principal executive offices)

10036
(Zip Code)

(646) 454-3759
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all documents and reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days:

Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the last practicable date:

Class
Common Stock, \$.01 par value

Outstanding at March 20, 2014

CHIMERA INVESTMENT CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization

Chimera Investment Corporation (the "Company") was organized in Maryland on June 1, 2007. The Company commenced operations on November 21, 2007 when it completed its initial public offering. The Company elected to be taxed as a real estate investment trust ("REIT") under the Internal Revenue Code of 1986, as amended, and regulations promulgated thereunder (the "Code"). The Company formed the following wholly-owned qualified REIT subsidiaries: Chimera Securities Holdings, LLC in July 2008; Chimera Asset Holding LLC and Chimera Holding LLC in June 2009; and Chimera Special Holding LLC in January 2010 which is a wholly-owned subsidiary of Chimera Asset Holding LLC. In July 2010, the Company formed CIM Trading Company LLC, a wholly-owned taxable REIT subsidiary ("TRS").

Annaly Capital Management, Inc. ("Annaly") owns approximately 4.38% of the Company's common shares. The Company is managed by Fixed Income Discount Advisory Company ("FIDAC"), an investment advisor registered with the Securities and Exchange Commission ("SEC"). FIDAC is a wholly-owned subsidiary of Annaly.

2. Summary of the Significant Accounting Policies

(a) Basis of Presentation and Consolidation

The accompanying consolidated financial statements and related notes of the Company have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). In the opinion of management, all adjustments considered necessary for a fair presentation of the Company's financial position, results of operations and cash flows have been included. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the year ended December 31, 2012. Certain prior year amounts have been reclassified to conform to the current year's presentation.

The consolidated financial statements include, on a consolidated basis, the Company's accounts, the accounts of its wholly-owned subsidiaries, and variable interest entities ("VIEs") in which the Company is the primary beneficiary. All significant intercompany balances and transactions have been eliminated in consolidation.

The Company uses securitization trusts considered to be VIEs in its securitization and re-securitization transactions. VIEs are defined as entities in which equity investors (i) do not have the characteristics of a controlling financial interest, and/or (ii) do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties. The entity that consolidates a VIE is known as its primary beneficiary, and is generally the entity with (i) the power to direct the activities that most significantly impact the VIEs' economic performance, and (ii) the right to receive benefits from the VIE or the obligation to absorb losses of the VIE that could be significant to the VIE. For VIEs that do not have substantial on going activities, the power to direct the activities that most significantly impact the VIEs' economic performance may be determined by an entity's involvement with the design and structure of the VIE.

The trusts are structured as pass through entities that receive principal and interest on the underlying collateral and distribute those payments to the certificate holders. The assets held by the securitization entities are restricted in that they can only be used to fulfill the obligations of the securitization entity. The Company's risks associated with its involvement with these VIEs are limited to its risks and rights as a certificate holder of the bonds it has retained. There have been no recent changes to the nature of risks associated with the Company's involvement with VIEs.

Determining the primary beneficiary of a VIE requires significant judgment. The Company determined that for the securitizations it consolidates, its ownership of substantially all subordinate interests provided the Company with the obligation to absorb losses and/or the right to receive benefits from the VIE that could be significant to the VIE. In addition, the Company is considered to have the power to direct the activities of the VIEs that most significantly impact the VIEs' economic performance ("power") or the Company was determined to have power in connection with its involvement with the purpose and design of the VIE.

The Company's interest in the assets held by these securitization vehicles, which are consolidated on the Company's Statements of Financial Condition, is restricted by the structural provisions of these entities, and a recovery of the Company's investment in the vehicles will be limited by each entity's distribution provisions. The liabilities of the securitization vehicles, which are also consolidated on the Company's Statements of Financial Condition, are non-recourse to the Company, and can generally only be satisfied from each securitization vehicle's respective asset pool.

The securitization entities are comprised of senior classes of residential mortgage backed securities ("RMBS") and jumbo, prime, residential mortgage loans. See Notes 3, 4 and 8 for further discussion of the characteristics of the securities and loans in the Company's portfolio.

The Company is not obligated to provide, nor has it provided, any financial support to these consolidated securitization vehicles.

(b) Statements of Financial Condition Presentation

The Company's Consolidated Statements of Financial Condition separately present: (i) the Company's direct assets and liabilities, and (ii) the assets and liabilities of consolidated securitization vehicles. Assets of each consolidated VIE can only be used to satisfy the obligations of that VIE, and the liabilities of consolidated VIEs are non-recourse to the Company.

The Company has aggregated all the assets and liabilities of the consolidated securitization vehicles due to the determination that these entities are substantively similar and therefore a further disaggregated presentation would not be more meaningful. The notes to the consolidated financial statements describe the Company's direct assets and liabilities and the assets and liabilities of consolidated securitization vehicles. See Note 8 for additional information related to the Company's investments in consolidated securitization vehicles.

(c) Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and cash deposited overnight in money market funds, which are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation. There were no restrictions on cash and cash equivalents at June 30, 2013 and December 31, 2012.

(d) Agency and Non-Agency Residential Mortgage-Backed Securities

The Company invests in RMBS representing interests in obligations backed by pools of mortgage loans. The Company delineates between Agency RMBS and Non-Agency RMBS as follows: Agency RMBS are mortgage pass-through certificates, collateralized mortgage obligations ("CMOs"), and other RMBS representing interests in or obligations backed by pools of mortgage loans issued or guaranteed by agencies of the U.S. Government, such as Ginnie Mae, or federally chartered corporations such as Freddie Mac or Fannie Mae where principal and interest repayments are guaranteed by the respective agency of the U.S. Government or federally chartered corporation. Non-Agency RMBS are not issued or guaranteed by a U.S. Government Agency or other institution and are subject to credit risk. Repayment of principal and interest on Non-Agency RMBS is subject to the performance of the mortgage loans or RMBS collateralizing the obligation.

The Company classifies its RMBS as available-for-sale, records investments at estimated fair value as described in Note 5 of these consolidated financial statements, and includes unrealized gains and losses considered to be temporary on all RMBS, excluding interest-only ("IO") strips, in Other comprehensive income (loss) in the Consolidated Statements of Operations and Comprehensive Income (Loss). IO strips are recorded at estimated fair value and all unrealized gains and losses are included in earnings in the Consolidated Statements of Operations and Comprehensive Income (Loss). From time to time, as part of the overall management of its portfolio, the Company may sell any of its RMBS investments and recognize a realized gain or loss as a component of earnings in the Consolidated Statements of Operations and Comprehensive Income (Loss) utilizing the average cost method.

The Company's accounting policy for interest income and impairment related to its RMBS is as follows:

Interest Income Recognition

The recognition of interest income on RMBS securities varies depending on the characteristics of the security as follows:

Agency RMBS and Non-Agency RMBS of High Credit Quality

The Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 310-20, *Nonrefundable Fees and Other Costs* ("ASC 310-20") is applied to the recognition of interest income for the following securities:

- Agency RMBS
- Non-Agency RMBS that meet all of the following conditions at the acquisition date (referred to hereafter as "Non-Agency RMBS of High Credit Quality"):
 1. Rated AA or higher by a nationally recognized credit rating agency. The Company uses the lowest rating available.
 2. The Company expects to collect all of the security's contractual cash flows.
 3. The security cannot be contractually prepaid such that the Company would not recover substantially all of its recorded investment.

Under ASC 310-20, interest income, including premiums and discounts associated with the acquisition of these securities, is recognized over the life of such securities using the interest method based on the contractual cash flows of the security. In applying the interest method, the Company considers estimates of future principal prepayments in the calculation of the constant effective yield. Differences that arise between previously anticipated prepayments and actual prepayments received, as well as changes in future prepayment assumptions, result in a recalculation of the effective yield on the security on a quarterly basis. This recalculation results in the recognition of an adjustment to the carrying amount of the security based on the revised prepayment assumptions and a corresponding increase or decrease in reported interest income.

Non-Agency RMBS Not of High Credit Quality

Non-Agency RMBS that are purchased at a discount and that are not of high credit quality at the time of purchase are accounted for under ASC 310-30 *Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("ASC 310-30") or ASC 325-40, *Beneficial Interests in Securitized Financial Assets* ("ASC 325-40") (referred to hereafter as "Non-Agency RMBS Not of High Credit Quality").

Non-Agency RMBS are accounted for under ASC 310-30 if the following conditions are met as of the acquisition date:

1. There is evidence of deterioration in credit quality of the security from its inception.
2. It is probable that the Company will be unable to collect all contractual cash flows of the security.

Non-Agency RMBS that are not within the scope of ASC 310-30 are accounted for under ASC 325-40 if at the acquisition date:

1. The security is not of high credit quality (defined as rated below AA or is unrated), or
2. The security can contractually be prepaid or otherwise settled in such a way that the Company would not recover substantially all of its recorded investment.

Interest income on Non-Agency RMBS Not of High Credit Quality is recognized using the interest method based on management's estimates of cash flows expected to be collected. The effective interest rate on these securities is based on management's estimate for each security of the projected cash flows, which are estimated based on observation of current market information and include assumptions related to fluctuations in prepayment speeds and the timing and amount of credit losses. Quarterly, the Company reviews and, if appropriate, makes adjustments to its cash flow projections based on inputs and analyses received from external sources, internal models, and the Company's judgments about prepayment rates, the timing and amount of credit losses, and other factors. Changes in the amount and/or timing of cash flows from those originally projected, or from those estimated at the last evaluation date, are considered to be either positive changes or adverse changes. For securities accounted for under ASC 325-40, any positive or adverse change in cash flows that does not result in the recognition of an other-than-temporary impairment ("OTTI") results in a prospective increase or decrease in the effective interest rate used to recognize interest income. For securities accounted for under ASC 310-30, only significant positive changes are reflected prospectively in the effective interest rate used to recognize interest income. Adverse changes in cash flows expected to be collected are generally treated consistently for RMBS accounted for under ASC 325-40 and ASC 310-30, and generally result in recognition of an OTTI with no change in the effective interest rate used to recognize interest income.

Impairment

Considerations Applicable to all RMBS

When the fair value of an available-for-sale RMBS is less than its amortized cost the security is considered impaired. On at least a quarterly basis the Company evaluates its securities for OTTI. If the Company intends to sell an impaired security, or it is more-likely-than-not that the Company will be required to sell an impaired security before its anticipated recovery, then the Company must recognize an OTTI through a charge to earnings equal to the entire difference between the investment's amortized cost and its fair value at the measurement date. If the Company does not intend to sell an impaired security and it is not more-likely-than-not that it would be required to sell an impaired security before recovery, the Company must further evaluate the security for impairment due to credit losses. The credit component of OTTI is recognized in earnings and the remaining or non-credit component is recorded as a component of Other comprehensive income (loss) ("OCI"). Following the recognition of an OTTI through earnings, a new amortized cost basis is established for the security and subsequent recoveries in fair value may not be adjusted through earnings.

When evaluating whether the Company intends to sell an impaired security or will more-likely-than-not be required to sell an impaired security before recovery, the Company makes judgments that consider among other things, its liquidity, leverage, contractual obligations, and targeted investment strategy to determine its intent and ability to hold the investments that are deemed impaired. The determination as to whether an OTTI exists is subjective as such determinations are based on factual information available at the time of assessment as well as the Company's estimates of future conditions. As a result, the determination of OTTI and its timing and amount is based on estimates that may change materially over time.

The Company's estimate of the amount and timing of cash flows for its RMBS is based on its review of the underlying securities or mortgage loans securing the RMBS. The Company considers historical information available and expected future performance of the underlying securities or mortgage loans, including timing of expected future cash flows, prepayment rates, default rates, loss severities, delinquency rates, percentage of non-performing loans, extent of credit support available, Fair Isaac Corporation ("FICO") scores at loan origination, year of origination, loan-to-value ratios, geographic concentrations, as well as reports by credit rating agencies, such as Moody's Investors Service, Inc., Standard & Poor's Rating Services or Fitch Ratings, Inc., general market assessments and dialogue with market participants. As a result, substantial judgment is used in the Company's analysis to determine the expected cash flows for its RMBS.

Considerations Applicable to Non-Agency RMBS of High Credit Quality

The impairment assessment for Non-Agency RMBS of High Credit Quality involves comparing the present value of the remaining cash flows expected to be collected to the amortized cost of the security at the assessment date. The discount rate used to calculate the present value of the expected future cash flows is based on the security's effective interest rate as calculated under ASC 310-20 (i.e., the discount rate implicit in the security as of the last measurement date). If the present value of the remaining cash flows expected to be collected is less than the amortized cost basis, an OTTI is recognized in earnings for the difference. This amount is considered to be the credit loss component; the remaining difference between amortized cost and the fair value of the security is considered to be the portion of loss recognized in other comprehensive income (loss).

Following the recognition of an OTTI through earnings for the credit loss component, a new amortized cost basis is established for the security and subsequent recoveries in fair value may not be adjusted through earnings.

Considerations Applicable to Non-Agency RMBS Not of High Credit Quality

Non-Agency RMBS within the scope of ASC 325-40 or ASC 310-30 are considered other-than-temporarily impaired when the following two conditions exist: (1) the fair value is less than the amortized cost basis, and (2) there has been an adverse change in cash flows expected to be collected from the last measurement date (i.e., adverse changes in either the amount or timing of cash flows from those previously expected).

The OTTI is separated into a credit loss component that is recognized in earnings and the portion of loss recognized in other comprehensive income (loss). The credit component is comprised of the impact of the fair value decline due to changes in assumptions related to default (collection) risk and prepayments. The portion of loss recognized in other comprehensive income (loss) comprises the change in fair value of the security due to all other factors, including changes in benchmark interest rates and market liquidity. In determining the OTTI related to credit losses for securities, the Company compares the present value of the remaining cash flows adjusted for prepayments expected to be collected at the current financial reporting date to the present value of the remaining cash flows expected to be collected at the original purchase date (or the last date those estimates were revised for accounting purposes). The discount rate used to calculate the present value of expected future cash flows is the effective interest rate used for income recognition purposes as determined under ASC 325-40 or ASC 310-30.

Following the recognition of an OTTI through earnings for the credit component, a new amortized cost basis is established for the security and subsequent recoveries in fair value may not be adjusted through earnings. However, to the extent that there are subsequent increases in cash flows expected to be collected, the OTTI previously recorded through earnings may be accreted into interest income following the guidance in ASC 325-40 or ASC 310-30.

The determination of whether an OTTI exists and, if so, the extent of the credit component is subject to significant judgment and management's estimates of both historical information available at the time of assessment, the current market environment, as well as the Company's estimates of the future performance and projected amount and timing of cash flows expected to be collected on the security. As a result, the timing and amount of OTTI constitutes an accounting estimate that may change materially over time.

(e) Interest-Only RMBS

The Company invests in IO Agency and Non-Agency RMBS strips. IO RMBS strips represent the Company's right to receive a specified proportion of the contractual interest flows of the collateral. The Company has accounted for IO RMBS strips at fair value with changes in fair value recognized in the Company's Consolidated Statements of Operations and Comprehensive Income (Loss). The Company has elected the fair value option to account for IO RMBS strips to simplify the reporting of changes in fair value. The IO RMBS strips are included in RMBS, at fair value, on the accompanying Consolidated Statements of Financial Condition. Interest income on IO RMBS strips is accrued based on the outstanding notional balance and the security's contractual terms, and amortization of any premium or discount is calculated in accordance with ASC 325-40. Changes in fair value are presented in Net unrealized gains (losses) on interest-only RMBS on the Consolidated Statement of Operations and Comprehensive Income (Loss). Interest income reported on IO RMBS strips was \$6.9 million and \$7.7 million for the quarters ended June 30, 2013, and 2012, respectively. Interest income reported on IO securities was \$10.2 million and \$13.7 million for the six months ended June 30, 2013 and 2012, respectively.

(f) Securitized Loans Held for Investment and Related Allowance for Loan Losses

The Company's securitized residential mortgage loans are comprised of fixed-rate and variable-rate loans. Mortgage loans are designated as held for investment, and are carried at their principal balance outstanding, plus any premiums, less discounts and allowances for loan losses. Interest income on loans held for investment is recognized over the expected life of the loans using the interest method. Nonrefundable fees and costs related to acquiring the Company's securitized residential mortgage loans are recognized as expenses over the life of the associated debt using the interest method of amortization. Income recognition is suspended for loans when, based on information from the servicer, a full recovery of interest or principal becomes doubtful. The Company estimates the fair value of securitized loans for disclosure purposes only as described in Note 5 of these consolidated financial statements.

(g) Allowance for Loan Losses – Securitized Loans Held for Investment

The securitized loan portfolio is comprised primarily of non-conforming, single family, owner occupied, jumbo, prime loans that are not guaranteed as to repayment of principal or interest. Securitized loans are serviced and modified by a third-party servicer. The Company generally has the ability to approve certain loan modifications and determine the course of action to be taken as it relates to certain loans in technical default, including whether or not to proceed with foreclosure.

The Company has established an allowance for loan losses related to securitized loans that is composed of a general and specific reserve. The general reserve relates to loans that have not been individually evaluated for impairment. The Company's general reserve is based on historical loss rates for pools of loans with similar credit characteristics, adjusted for current trends and market conditions, including current trends in delinquencies and severities.

The Company has established a specific reserve that reflects consideration of loans more than 60 days delinquent, loans in foreclosure, and borrowers that have declared bankruptcy. The loan loss provision related to these loans is measured as the difference between the unpaid principal balance and the estimated fair value of the property securing the mortgage, less estimated costs to sell. The specific reserve also reflects consideration of concessions granted to borrowers by the servicer in the form of modifications (i.e., reductions). Loan loss provisions related to these modifications are based on the contractual principal and interest payments, post-modification, discounted at the loan's original effective interest rate. Loans with specific reserves are individually evaluated for impairment. Loan modifications made by the servicer are evaluated to determine if they constitute troubled debt restructurings ("TDRs"). A restructuring of a loan constitutes a TDR if the servicer, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. Impairment of modified loans considered to be TDRs is measured based on the present value of expected cash flows discounted at the loan's effective interest rate at inception. If the present value of expected cash flows is less than the recorded investment in the loan, an allowance for loan losses is recognized with a corresponding charge to the provision for loan losses. Impairment of all other loans individually evaluated is measured as the difference between the unpaid principal balance and the estimated fair value of the collateral, less estimated costs to sell. The Company charges off the corresponding loan allowance and related principal balance when the servicer reports a realized loss. A complete discussion of securitized loans held for investment is included in Note 4 to these consolidated financial statements.

(h) Repurchase Agreements

The Company finances the acquisition of a significant portion of its Agency mortgage-backed securities with repurchase agreements. The Company has evaluated each agreement and determined that each of the repurchase agreements be accounted for as secured borrowings. None of the Company's repurchase agreements are accounted for as components of linked transactions. As a result, the Company separately accounts for the financial assets posted as collateral and related repurchase agreements in the accompanying consolidated financial statements.

(i) Securitized Debt, Non-Agency RMBS Transferred to Consolidated VIEs, and Securitized Debt, Loans Held for Investment

The Company has issued securitized debt to finance a portion of its residential mortgage loan and RMBS portfolios. Certain transactions involving residential mortgage loans are accounted for as secured borrowings, and are recorded as Securitized loans held for investment and the corresponding debt as Securitized debt, collateralized by loans held for investment in the Consolidated Statements of Financial Condition. These securitizations are collateralized by residential adjustable or fixed rate mortgage loans that have been placed in a trust and pay interest and principal to the debt holders of that securitization. Re-securitization transactions classified as Securitized debt, collateralized by Non-Agency RMBS reflect the transfer to a trust of fixed or adjustable rate RMBS which are classified as Non-Agency RMBS transferred to consolidated VIEs that pay interest and principal to the debt holders of that re-securitization. Re-securitization transactions completed by the Company that did not qualify as sales are accounted for as secured borrowings. The associated securitized debt is carried at amortized cost. The Company estimates the fair value of its securitized debt for disclosure purposes as described in Note 5 to these consolidated financial statements.

(j) Fair Value Disclosure

A complete discussion of the methodology utilized by the Company to estimate the fair value of its financial instruments is included in Note 5 to these consolidated financial statements.

(k) Derivative Financial Instruments

The Company's investment policies permit it to enter into derivative contracts, including interest rate swaps, interest rate caps, options, and futures as a means of managing its interest rate risk as well as to enhance investment returns. The Company's derivatives are recorded as either assets or liabilities in the Consolidated Statements of Financial Condition and measured at fair value. Net payments on derivative instruments are included in the Consolidated Statements of Cash Flows as a component of net income (loss). Unrealized gains (losses) on derivatives are removed from net income (loss) to arrive at cash flows from operating activities. The Company estimates the fair value of its derivative instruments as described in Note 5 of these consolidated financial statements.

The Company elects to net by counterparty the fair value of its derivative contracts when appropriate. These contracts contain legally enforceable provisions that allow for netting or setting off of all individual swaps receivable and payable with each counterparty and, therefore, the fair value of those swap contracts are reported net by counterparty. The credit support annex provisions of the Company's interest rate swap contracts allow the parties to mitigate their credit risk by requiring the party which is in a net payable position to post collateral. As the Company elects to net by counterparty the fair value of interest rate swap contracts, it also nets by counterparty any cash collateral exchanged as part of the interest rate swap contracts.

(l) Sales, Securitizations, and Re-Securitizations

The Company periodically enters into transactions in which it sells financial assets, such as RMBS, and mortgage loans. Gains and losses on sales of assets are calculated using the average cost method whereby the Company records a gain or loss on the difference between the average amortized cost of the asset and the proceeds from the sale. In addition, the Company from time to time securitizes or re-securitizes assets and sells tranches in the newly securitized assets. These transactions may be recorded as either sales and the assets contributed to the securitization are removed from the Consolidated Statements of Financial Condition and a gain or loss is recognized, or as secured borrowings whereby the assets contributed to the securitization are not derecognized but rather the debt issued by the securitization entity are recorded to reflect the term financing of the assets. In these securitizations and re-securitizations, the Company may retain senior or subordinated interests in the securitized and/or re-securitized assets.

(m) Income Taxes

The Company has elected to be taxed as a REIT and intends to comply with the provision of the Code, with respect thereto. Accordingly, the Company will not be subject to federal, state or local income tax to the extent that qualifying distributions are made to stockholders and as long as certain asset, income, distribution and stock ownership tests are met. If the Company failed to qualify as a REIT and did not qualify for certain statutory relief provisions, the Company would be subject to federal, state and local income taxes and may be precluded from qualifying as a REIT for the subsequent four taxable years following the year in which the REIT qualification was lost. The Company and CIM Trading made a joint election to treat CIM Trading as a TRS. As such, CIM Trading is taxable as a domestic C corporation and subject to federal, state, and local income taxes based upon its taxable income.

A tax position is recognized only when, based on management's judgment regarding the application of income tax laws, it is more likely than not that the tax position will be sustained upon examination. The Company does not have any unrecognized tax benefits that would affect its financial position or require disclosure. No accruals for penalties and interest were necessary as of June 30, 2013 or December 31, 2012.

(n) Net Income per Share

The Company calculates basic net income per share by dividing net income for the period by the basic weighted-average shares of its common stock outstanding for that period. Diluted net income per share takes into account the effect of dilutive instruments such as unvested restricted stock.

(o) Stock-Based Compensation

The Company accounts for stock-based compensation awards granted to the employees of FIDAC and FIDAC's affiliates at the fair value of the stock-based compensation provided. The Company measures the fair value of the equity instrument using the stock prices and other measurement assumptions as of the earlier of either the date at which a performance commitment by the recipient is reached or the date at which the recipient's performance is complete. Stock compensation expense related to the grants of stock is recognized over the vesting period of such grants based on the fair value of the stock on each quarterly vesting date, at which the recipient's performance is complete.

Compensation expense for equity based awards granted to the Company's independent directors is recognized pro-rata over the vesting period of such awards, based upon the fair value of such awards at the grant date.

(p) Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although the Company's estimates contemplate current conditions and how it expects them to change in the future, it is reasonably possible that actual conditions could be materially different than anticipated in those estimates, which could have a material adverse impact on the Company's results of operations and its financial condition. Management has made significant estimates in accounting for income recognition and OTTI on Agency and Non-Agency RMBS and IO RMBS (Note 3), valuation of Agency and Non-Agency RMBS (Notes 3 and 5), and interest rate swaps (Notes 5 and 9). Actual results could differ materially from those estimates.

(q) Recent Accounting Pronouncements

Presentation

Balance Sheet (Topic 210)

On December 23, 2011, the FASB released Accounting Standards Update ("ASU") 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*. Under this update, the Company is required to disclose both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and transactions subject to an agreement similar to a master netting arrangement. The scope includes derivatives, sale and repurchase agreements and reverse sale and repurchase agreements and securities borrowing and securities lending arrangements. This disclosure is intended to enable financial statement users to understand the effect of such arrangements on the Company's financial position. The Company adopted this guidance in the first quarter of 2013. As this standard only requires additional disclosure, the adoption of ASU 2011-11 did not have any effect on the consolidated financial statements. The additional disclosures related to the Company's repurchase agreements and derivatives are presented in Note 14.

Comprehensive Income (Topic 220)

In February 2013, the FASB issued ASU 2013-02 *Comprehensive Income: Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. This update requires the disclosure of information about the amounts reclassified out of accumulated OCI by component. In addition, it requires presentation, either on the face of the statement where net income is presented or in the Notes, significant amounts reclassified out of accumulated OCI by the respective line items of net income, but only if the amount reclassified is required under GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under GAAP to be reclassified in their entirety to net income, a cross-reference must be provided to other disclosures required under GAAP that provide additional detail about those amounts. The Company adopted this guidance in the first quarter of 2013. As this standard only requires additional disclosure, the adoption of ASU 2013-02 did not have any effect on the consolidated financial statements. The additional disclosures related to accumulated OCI are presented in Note 11.

Broad Transactions

Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40)

In January 2014, the FASB issued ASU No. 2014-04, *Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure*. This update clarifies when the Company is considered to have obtained physical possession, from an in-substance possession or foreclosure, of a residential real estate property collateralizing a mortgage loan. Current guidance indicates that the Company should reclassify a collateralized mortgage loan such that the loan should be derecognized and the collateral asset recognized when it determines that there has been an in-substance repossession or foreclosure by the Company. This update defines the term *in substance repossession or foreclosure* to reduce diversity in interpretation of when such an event occurs. The guidance in this update is effective for the Company beginning January 1, 2015. The Company is evaluating the impact of this update.

3. Residential Mortgage-Backed Securities

The Company classifies its Non-Agency RMBS as senior IO, subordinated, subordinated IO, and Non-Agency RMBS transferred to consolidated VIEs. The Company also invests in Agency RMBS. Senior interests in Non-Agency RMBS are considered to be entitled to the first principal repayments in their pro-rata ownership interests at the reporting date. The total fair value of the Non-Agency RMBS that are held by consolidated re-securitization trusts was \$3.2 billion and \$3.3 billion at June 30, 2013 and December 31, 2012, respectively. See Note 8 of these consolidated financial statements for further discussion of consolidated VIEs.

The following tables present the principal or notional value, total premium, total discount, amortized cost, fair value, gross unrealized gains, gross unrealized losses, and net unrealized gain (loss) related to the Company's available-for-sale RMBS portfolio as of June 30, 2013 and December 31, 2012, by asset class.

	June 30, 2013 (dollars in thousands)

RMBS transferred to consolidated VIEs	-	-	-	22,490	(197)	1	22,490	(197)	1
Agency RMBS	234	(76)	2	993	(241)	2	1,227	(317)	4
Total	\$ 17,998	\$ (2,904)	14	\$ 140,836	\$ (26,725)	35	\$ 158,834	\$ (29,629)	49

At June 30, 2013, the Company did not intend to sell any of its RMBS that were in an unrealized loss position, and it was not more likely than not that the Company would be required to sell these RMBS before recovery of their amortized cost basis, which may be at their maturity. With respect to RMBS held by consolidated VIEs, the ability of any entity to cause the sale by the VIE prior to the maturity of these RMBS is either expressly prohibited, not probable, or is limited to specified events of default, none of which have occurred to date.

Gross unrealized losses on the Company's Agency RMBS were \$38.7 million and \$317 thousand at June 30, 2013 and December 31, 2012, respectively. Given the credit quality inherent in Agency RMBS, the Company does not consider any of the current impairments on its Agency RMBS to be credit related. In evaluating whether it is more likely than not that it will be required to sell any impaired security before its anticipated recovery, which may be at their maturity, the Company considers the significance of each investment, the amount of impairment, the projected future performance of such impaired securities, as well as the Company's current and anticipated leverage capacity and liquidity position. Based on these analyses, the Company determined that at June 30, 2013 and December 31, 2012 unrealized losses on its Agency RMBS were temporary.

Gross unrealized losses on the Company's Non-Agency RMBS (excluding IO Agency and Non-Agency RMBS strips which are accounted for under the fair value option with changes in fair value recorded in earnings) were \$2.2 million and \$6.9 million at June 30, 2013 and December 31, 2012, respectively. Based upon the most recent evaluation, the Company does not consider these unrealized losses to be indicative of OTTI and does not believe that these unrealized losses are credit related, but rather are due to other factors. The Company has reviewed its Non-Agency RMBS that are in an unrealized loss position to identify those securities with losses that are other-than-temporary based on an assessment of changes in cash flows expected to be collected for such RMBS, which considers recent bond performance and expected future performance of the underlying collateral.

A summary of the OTTI included in earnings for the quarters and six months ended June 30, 2013 and 2012 is presented below.

	For the Quarter Ended	
	June 30, 2013	June 30, 2012
	(dollars in thousands)	
Total other-than-temporary impairment losses	\$ -	\$ (12,474)
Portion of loss recognized in other comprehensive income (loss)	-	(53,213)
Net other-than-temporary credit impairment losses	\$ -	\$ (65,687)

	For the Six Months Ended	
	June 30, 2013	June 30, 2012
	(dollars in thousands)	
Total other-than-temporary impairment losses	\$ -	\$ (44,551)
Portion of loss recognized in other comprehensive income (loss)	(6,163)	(69,500)
Net other-than-temporary credit impairment losses	\$ (6,163)	\$ (114,051)

The following table presents a roll forward of the credit loss component of OTTI on the Company's Non-Agency RMBS for which a portion of loss was previously recognized in OCI. The table delineates between those securities that are recognizing OTTI for the first time as opposed to those that have previously recognized OTTI.

	For the Quarter Ended	
	June 30, 2013	June 30, 2012
	(dollars in thousands)	
Cumulative credit loss beginning balance	\$ 513,946	\$ 493,900
Additions:		
Other-than-temporary impairments not previously recognized	-	58,101
Reductions for securities sold during the period	(10,760)	-
Increases related to other-than-temporary impairments on securities with previously recognized other-than-temporary impairments	-	7,586
Reductions for increases in cash flows expected to be collected that are recognized over the remaining life of the security	(4,934)	(18,928)
Cumulative credit loss ending balance	\$ 498,252	\$ 540,659

	For the Six Months Ended	
	June 30, 2013	June 30, 2012
	(dollars in thousands)	
Cumulative credit loss beginning balance	\$ 510,089	\$ 452,060
Additions:		
Other-than-temporary impairments not previously recognized	712	89,928
Reductions for securities sold during the period	(11,119)	(290)
Increases related to other-than-temporary impairments on securities with previously recognized other-than-temporary impairments	5,451	24,123
Reductions for increases in cash flows expected to be collected over the remaining life of the securities	(6,881)	(25,162)
Cumulative credit impairment loss ending balance	\$ 498,252	\$ 540,659

Cash flows generated to determine net other-than-temporary credit impairment losses recognized in earnings are estimated using significant unobservable inputs. The significant inputs used to measure the component of OTTI recognized in earnings for the Company's Non-Agency RMBS are summarized as follows:

For the Six Months Ended
June 30, 2013 June 30, 2012

Loss Severity		
Weighted Average	45%	58%
Range	41% - 69%	45% - 86%
60+ days delinquent		
Weighted Average	16%	28%
Range	0% - 34%	9% - 53%
Credit Enhancement (1)		
Weighted Average	10%	10%
Range	0% - 48%	0% - 75%
3 Month CPR		
Weighted Average	18%	16%
Range	0% - 25%	3% - 30%
12 Month CPR		
Weighted Average	20%	16%
Range	9% - 35%	8% - 25%

(1) Calculated as the combined credit enhancement to the Re-REMIC and underlying from each of their respective capital structures.

The following tables present a summary of unrealized gains and losses at June 30, 2013 and December 31, 2012. IO RMBS included in the tables below represent the right to receive a specified proportion of the contractual interest cash flows of the underlying principal balance of specific securities. At June 30, 2013, IO RMBS had a net unrealized loss of \$18.8 million and had an amortized cost of \$356.8 million. At December 31, 2012, IO RMBS had a net unrealized loss of \$4.8 million and had an amortized cost of \$166.0 million. The fair value of IOs at June 30, 2013 and December 31, 2012 was \$338.0 million, and \$161.2 million, respectively. All changes in fair value of IOs are reflected in Net income (loss).

Changes in prepayments, actual cash flows, and cash flows expected to be collected, among other items, are affected by the collateral characteristics of each asset class. The portfolio is most heavily weighted to contain Non-Agency RMBS with credit risk. The Company chooses assets for the portfolio after carefully evaluating each investment's risk profile.

The following tables provide a summary of the Company's RMBS portfolio at June 30, 2013 and December 31, 2012.

B	1.19%	1.19%
Below B or not rated	96.81%	96.93%
Total	100.00%	100.00%

Actual maturities of RMBS are generally shorter than the stated contractual maturities. Actual maturities of the Company's RMBS are affected by the contractual lives of the underlying mortgages, periodic payments of principal and prepayments of principal. The following tables provide a summary of the fair value and amortized cost of the Company's RMBS at June 30, 2013 and December 31, 2012 according to their estimated weighted-average life classifications. The weighted-average lives of the RMBS in the tables below are based on lifetime expected prepayment rates using an industry prepayment model for the Agency RMBS portfolio and the Company's prepayment assumptions for the Non-Agency RMBS. The prepayment model considers current yield, forward yield, steepness of the interest rate curve, current mortgage rates, mortgage rates of the outstanding loan, loan age, margin, and volatility.

The Non-Agency RMBS portfolio is subject to credit risk. The Company seeks to mitigate credit risk through its asset selection process. The Non-Agency RMBS portfolio is primarily collateralized by what the Company classifies as Alt-A first lien mortgages. The Company categorizes collateral as Alt-A regardless of whether the loans were originally described as “prime” if the behavior of the collateral when the Company purchased the security more typically resembles Alt-A. The Company defines Alt-A collateral characteristics to be evidenced by the 60+ day delinquency bucket of the pool being greater than 5% and the weighted average FICO scores at the time of origination as greater than 650. At June 30, 2013, 99.2% of the Non-Agency RMBS collateral was Alt-A. At December 31, 2012, 99.5% of the Non-Agency RMBS collateral was Alt-A.

The Non-Agency RMBS in the Portfolio have the following collateral characteristics at June 30, 2013 and December 31, 2012.

	December 31,	
	June 30, 2013	2012
Weighted average maturity (years)	25.01	24.8
Weighted average amortized loan to value (1)	70.6%	71.6%
Weighted average FICO (2)	713	717
Weighted average loan balance (in thousands)	\$ 415.0	\$ 453.1
Weighted average percentage owner occupied	84.7%	85.1%

	NY 6.5%	NY 6.4%
	NJ 2.7%	VA 2.4%
	MD 2.4%	NJ 2.8%

(1) Value represents appraised value of the collateral at the time of loan origination.

(2) FICO as determined at the time of loan origination.

The table below presents the origination year of the underlying loans related to the Company’s portfolio of Non-Agency RMBS at June 30, 2013 and December 31, 2012.

Origination Year	June 30, 2013	December 31, 2012
2000	0.8%	0.2%
2001	1.3%	0.2%
2002	0.7%	0.0%
2003	0.9%	0.4%
2004	1.9%	0.6%
2005	17.2%	14.3%
2006	33.3%	34.6%
2007	42.1%	46.7%
2008	1.8%	3.0%
Total	100.0%	100.0%

During the quarter ended June 30, 2013, the Company sold RMBS with a carrying value of \$375.3 million for a gross realized gain of \$54.1 million. During the quarter ended June 30, 2012, the Company had no sales of RMBS. During the six months ended June 30, 2013, the Company sold RMBS with a carrying value of \$375.5 million for a gross realized gain of \$54.1 million. During the six months ended June 30, 2012, the Company sold RMBS with a carrying value of \$63.0 million for a gross realized gains of \$16.0 million. There were no securities sold for a gross realized loss for the three and six month periods ended June 30, 2013 or 2012.

4. Securitized Loans Held for Investment

The Company is considered to be the primary beneficiary of VIEs formed for the purpose of securitizing whole mortgage loans. Refer to Note 8 for additional details regarding the Company’s involvement with VIEs.

The securitized loans held for investment are carried at their principal balance outstanding, plus unamortized premiums, less unaccreted discounts and an allowance for loan losses. There were no new securitizations during the quarter and six months ended June 30, 2013.

The following table provides a summary of the changes in the carrying value of securitized loans held for investment at June 30, 2013 and December 31, 2012:

	For the Six Months Ended June 30, 2013		For the Year Ended December 31, 2012	
	(dollars in thousands)			
Balance, beginning of period	\$	1,300,131	\$	256,632
Purchases		-		1,531,014
Principal paydowns		(367,765)		(477,555)
Net periodic amortization (accretion)		(9,079)		(9,592)
Change to loan loss provision		1,279		(368)
Balance, end of period	\$	924,566	\$	1,300,131

The following table represents the Company's securitized residential mortgage loans classified as held for investment at June 30, 2013 and December 31, 2012:

	June 30, 2013		December 31, 2012	
	(dollars in thousands)			
Securitized loans, at amortized cost	\$	934,152	\$	1,311,755
Less: allowance for loan losses		9,586		11,624
Securitized loans held for investment	\$	924,566	\$	1,300,131

The securitized loan portfolio is collateralized by prime, jumbo, first lien residential mortgages of which 36.4% were originated during 2012, 39.4% were originated during 2011, 8.1% during 2010, and the remaining 16.1% of the loans were originated prior to 2010. A summary of key characteristics of these loans follows.

	June 30, 2013				December 31, 2012			
Number of loans	1,207				1,618			
Weighted average maturity (years)	28.0				28.3			
Weighted average loan to value (1)	71.0	%			71.2	%		
Weighted average FICO (2)	766				768			
Weighted average loan balance (in thousands)	\$	784.8			\$	794.1		
Weighted average percentage owner occupied	93.9	%			94.6	%		
Weighted average percentage single family residence	69.6	%			70.6	%		
Weighted average geographic concentration of top five states	CA	34.9	%		CA	38.1	%	
	NY	6.7	%		VA	6.3	%	
	VA	5.4	%		NY	6.3	%	
	NJ	5.0	%		WA	5.2	%	
	WA	4.9	%		NJ	4.6	%	

(1) Value represents appraised value of the collateral at the time of loan origination.

(2) FICO as determined at the time of loan origination.

The following table summarizes the changes in the allowance for loan losses for the securitized mortgage loan portfolio at June 30, 2013 and December 31, 2012:

	For the Six Months Ended June 30, 2013		For the Year Ended December 31, 2012	
	(dollars in thousands)			
Balance, beginning of period	\$	11,624	\$	13,938
Provision for loan losses		(1,279)		368
Charge-offs		(759)		(2,682)
Balance, end of period	\$	9,586	\$	11,624

The Company has established an allowance for loan losses related to securitized loans that is composed of a general and specific reserve. The balance in the allowance for loan losses related to the general reserve at June 30, 2013 and December 31, 2012 was \$3.3 million and \$5.0 million, respectively. The balance in the allowance for loan losses related

to the specific reserve at June 30, 2013 and December 31, 2012 was \$6.3 million and \$6.6 million, respectively.

The Company's accounting policy for the provision for loan losses is described in Note 2(g).

The total unpaid principal balance of impaired loans for which the Company established a specific reserve was \$27.0 million and \$29.1 million at June 30, 2013 and December 31, 2012, respectively. The Company's recorded investment in impaired loans for which there is a related allowance for credit losses at June 30, 2013 and December 31, 2012 was \$19.4 million and \$21.8 million, respectively. Interest income on impaired loans is not significant.

The total unpaid principal balance of non-impaired loans for which the Company established a general reserve was \$889.4 million and \$1.3 billion at June 30, 2013 and December 31, 2012, respectively. The Company's recorded investment in loans that are not impaired for which there is a related general reserve for credit losses at June 30, 2013 and December 31, 2012 was \$905.2 million and \$1.3 billion, respectively.

The following table summarizes the outstanding principal balance of loans 30 days delinquent and greater as reported by the servicer at June 30, 2013 and December 31, 2012.

	30 Days Delinquent	60 Days Delinquent	90+ Days Delinquent (dollars in thousands)	Bankruptcy	Foreclosure	REO	Total
June 30, 2013	\$ 3,972	\$ 0	\$ 2,919	\$ 0	\$ 5,200	\$ 0	\$ 12,091
December 31, 2012	\$ 3,110	\$ 1,186	\$ 4,045	\$ 0	\$ 4,247	\$ 1,390	\$ 13,978

With the exception of its ability to approve certain loan modifications, the Company is not involved with the servicing or modification of loans held for investment. The trustee and servicer of the respective securitization are responsible for servicing and modifying these loans. The Company is required to make certain assumptions in accounting for loans held for investment due to the limitation of information available to the Company. The following table presents the loans that were modified by the servicer during the six months ended June 30, 2013 and 2012.

Six Months Ended	Number of Loans Modified During Period	Unpaid Principal Balance of Modified Loans (Pre- modification)	Unpaid Principal Balance of Modified Loans (Post-modification)	Amortized Cost of Modified Loans	Amortized Cost of Modified Loans For Which There is an Allowance for Loan Losses	Amortized Cost of Modified Loans For Which There is No Allowance for Loan Losses
June 30, 2013	3	\$ 2,349	\$ 2,358	\$ 2,248	\$ 2,248	\$ 0
June 30, 2012	6	\$ 3,424	\$ 3,536	\$ 3,518	\$ 3,518	\$ 0

Loans are modified by the servicer as a method of loss mitigation. Based on the information available, during the quarter and six months ended June 30, 2013, the Company determined that all loans modified by the servicer were considered TDRs, as defined under GAAP. A TDR is generally any modification of a loan to a borrower that is experiencing financial difficulties, where a lender agrees to terms that are more favorable to the borrower than are otherwise available in the current market. All loan modifications during the quarters and six months ended June 30, 2013 and 2012 included a reduction of the stated interest rates. Loans modified by the servicer have been individually assessed for impairment and measurement of impairment is based on the excess of the recorded investment in the loan over the present value of the expected cash flows, post modification, discounted at the loan's effective interest rate at inception. In the absence of additional loan modifications by the servicer in future periods that are considered to be TDRs, the \$4.9 million specific reserve related to TDRs as of June 30, 2013 will be recognized in net income in future periods by way of a decrease in the provision for loan losses. If there are further modifications, the reduction of the cashflow is reflected in the provision for loan losses.

As of June 30, 2013, there were no loans that were modified in the past twelve months and delinquent on scheduled payments.

5. Fair Value Measurements

The Company follows fair value guidance in accordance with GAAP to account for its financial instruments. The Company categorizes its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument. Financial assets and liabilities recorded at fair value on the Consolidated Statements of Financial Condition or disclosed in the related notes are categorized based on the inputs to the valuation techniques as follows:

Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets and liabilities in active markets.

Level 2 – inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 – inputs to the valuation methodology are unobservable and significant to fair value.

Fair value measurements categorized within Level 3 are sensitive to changes in the assumptions or methodology used to determine fair value and such changes could result in a significant increase or decrease in the fair value. For the Company's investments in Non-Agency RMBS categorized within Level 3 of the fair value hierarchy, the significant unobservable inputs include the discount rates, assumptions relating to prepayments, default rates and loss severities. Significant increases (decreases) in any of the discount rates, default rates or loss severities in isolation would result in a significantly lower (higher) fair value measurement. The impact of changes in prepayment speeds would have differing impacts on fair value, depending on the seniority of the investment. Generally, a change in the default assumption is accompanied by directionally similar changes in the assumptions used for the loss severity and the prepayment speed.

Any changes to the valuation methodology are reviewed by management to ensure the changes are appropriate. As markets and products evolve and the pricing for certain products becomes more transparent, the Company will continue to refine its valuation methodologies. The methodology utilized by the Company for the periods presented is unchanged. The methods used to produce a fair value calculation may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies, or assumptions, to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. The Company uses inputs that are current as of the measurement date, which may include periods of market dislocation, during which price transparency may be reduced.

During times of market dislocation, as has been experienced for some time and continues to exist, the observability of prices and inputs can be difficult for certain Non-Agency RMBS. If third party pricing services are unable to provide a price for an asset, or if the price provided by them is deemed unreliable by the Company, then the asset will be valued at its fair value as determined by the Company without validation to third-party pricing. In addition, validating third party pricing for the Company's investments may be more subjective as fewer participants may be willing to provide this service to the Company. Illiquid investments typically experience greater price volatility as an active market does not exist. Observability of prices and inputs can vary significantly from period to period and may cause instruments to change classifications within the three level hierarchy.

A description of the methodologies utilized by the Company to estimate the fair value of its financial instruments by instrument class follows:

Short-term Instruments

The carrying value of cash and cash equivalents, accrued interest receivable, dividends payable, and accrued interest payable are considered to be a reasonable estimate of fair value due to the short term nature of these financial instruments.

Agency and Non-Agency RMBS

Generally, the Company determines the fair value of its investment securities utilizing an internal pricing model that incorporates such factors as coupon, prepayment speeds, weighted average life, collateral composition, borrower characteristics, expected interest rates, life caps, periodic caps, reset dates, collateral seasoning, expected losses, expected default severity, credit enhancement, and other pertinent factors. Management reviews the fair values generated by the model to determine whether prices are reflective of the current market. Management indirectly corroborates its estimates of the fair value using pricing models by comparing its results to independent prices provided by dealers in the securities and/or third party pricing services. Certain very liquid asset classes, such as Agency fixed-rate pass-throughs may be priced using independent sources such as quoted prices for To-Be-Announced ("TBA") securities.

The Agency RMBS market is considered to be an active market such that participants transact with sufficient frequency and volume to provide transparent pricing information on an ongoing basis. The liquidity of the Agency RMBS market and the similarity of the Company's securities to those actively traded enable the Company to observe quoted prices in the market and utilize those prices as a basis for formulating fair value measurements. Consequently, the Company has classified Agency RMBS as having Level 2 inputs in the fair value hierarchy.

The Company's fair value estimation process for Non-Agency RMBS utilizes inputs other than quoted prices that are observed in the market. The Company's estimate of prepayment, default and severity curves all involve Management judgment and assumptions that are deemed to be significant to the fair value measurement process, which renders the resulting Non-Agency RMBS fair value estimates Level 3 inputs in the fair value hierarchy.

Interest Rate Swaps

The Company utilizes dealer quotes to determine the fair values of its interest rate swaps. The Company compares the dealer quotations received to its own estimate of fair value to evaluate for reasonableness. The dealer quotes incorporate common market pricing methods, including a spread measurement to the Treasury yield curve or interest rate swap curve as well as underlying characteristics of the particular contract. Interest rate swaps are modeled by the Company by incorporating such factors as the term to maturity, Treasury curve, overnight index swap rates, and the payment rates on the fixed portion of the interest rate swaps. The Company has classified the characteristics used to determine the fair value of interest rate swaps as Level 2 inputs in the fair value hierarchy.

The Company's financial assets and liabilities carried at fair value on a recurring basis, including the level in the fair value hierarchy, at June 30, 2013 and December 31, 2012 is presented below.

June 30, 2013 (dollars in thousands)			
	Level 1	Level 2	Level 3
Assets:			
Non-Agency RMBS			
Senior	\$ -	\$ -	\$ 73
Senior interest-only	-	-	264,723
Subordinated	-	-	470,586
Subordinated interest-only	-	-	14,047
RMBS transferred to consolidated VIEs	-	-	3,219,691
Agency RMBS	-	2,074,811	-
Interest rate swaps	-	-	-
Liabilities:			
Interest rate swaps	-	35,359	-
Total	\$ -	\$ 2,110,170	\$ 3,969,120

December 31, 2012 (dollars in thousands)			
	Level 1	Level 2	Level 3
Assets:			
Non-Agency RMBS			
Senior	\$ -	\$ -	\$ 88
Senior interest-only	-	-	122,869
Subordinated	-	-	547,794
Subordinated interest-only	-	-	16,253
RMBS transferred to consolidated VIEs	-	-	3,274,204
Agency RMBS	-	1,806,697	-
Liabilities:			
Interest rate swaps	-	53,939	-
Total	\$ -	\$ 1,860,636	\$ 3,961,208

The table below provides a summary of the changes in the fair value of securities classified as Level 3 at June 30, 2013 and December 31, 2012.

Fair Value Reconciliation, Level 3

	For the Six Months Ended June 30, 2013		For the Year Ended December 31, 2012	
	(dollars in thousands)			
Non-Agency RMBS				
Beginning balance Level 3 assets	\$	3,961,208	\$	4,088,945
Transfers in to Level 3 assets		-		-
Transfers out of Level 3 assets		-		-
Purchases		174,661		122,509
Principal payments		(234,236)		(516,370)
Sales		(143,864)		(328,261)
Accretion of purchase discounts		59,435		98,804
Gains (losses) included in net income				
Other than temporary credit impairment losses		(6,163)		(132,250)
Realized gains (losses) on sales		41,258		48,435
Net unrealized gains (losses) on interest-only RMBS		(13,309)		804
Gains (losses) included in other comprehensive income				
Total unrealized gains (losses) for the period		130,130		578,592
Ending balance Level 3 assets	\$	3,969,120	\$	3,961,208

There were no transfers to or from Level 3 for the six months ended June 30, 2013 and for the year ended December 31, 2012.

Sensitivity of Significant Inputs

The significant unobservable inputs used in the fair value measurement of the Company's Non-Agency RMBS are the weighted average discount rates, constant prepayment speed ("CPR"), cumulative default rate, and the loss severity.

Prepayment speeds, as reflected by the CPR, vary according to interest rates, the type of investment, conditions in financial markets, and other factors, none of which can be predicted with any certainty. In general, when interest rates rise, it is relatively less attractive for borrowers to refinance their mortgage loans, and as a result, prepayment speeds tend to decrease. When interest rates fall, prepayment speeds tend to increase. For RMBS investments purchased at a premium, as prepayment speeds increase, the amount of income the Company earns decreases as the purchase premium on the bonds amortizes faster than expected. Conversely, decreases in prepayment speeds result in increased income and can extend the period over which the Company amortizes the purchase premium. For RMBS investments purchased at a discount, as prepayment speeds increase, the amount of income the Company earns increases from the acceleration of the accretion of the discount into interest income. Conversely, decreases in prepayment speeds result in decreased income as the accretion of the purchase discount into interest income occurs over a longer period.

Cumulative default rates represent an annualized rate of default on a group of mortgages. The constant default rate ("CDR") represents the percentage of outstanding principal balances in the pool that are in default, which typically equates to the home being past 60-day and 90-day notices and in the foreclosure process. When default rates increase, expected cash flows on the underlying collateral decreases. When default rates decrease, expected cash flows on the underlying collateral increases.

Loss severity rates reflect the amount of loss expected from a foreclosure and liquidation of the underlying collateral in the mortgage loan pool. When a mortgage loan is foreclosed the collateral is sold and the resulting proceeds are used to settle the outstanding obligation. In many circumstances, the proceeds from the sale do not fully repay the outstanding obligation. In these cases a loss is incurred by the lender. Loss severity is used to predict how costly future losses are likely to be. An increase in loss severity results in a decrease in expected future cashflows. A decrease in loss severity results in an increase in expected future cashflows.

The discount rate refers to the interest rate used in discounted cash flow analysis to determine the present value of future cash flows. The discount rate takes into account not just the time value of money, but also the risk or uncertainty of future cash flows. An increased uncertainty of future cash flows results in a higher discount rate. The discount rate used to calculate the present value of the expected future cash flows is based on the discount rate implicit in the security as of the last measurement date. As discount rates move up, the discounted cash flows are reduced.

A summary of the significant inputs used to estimate the fair value of Non-Agency RMBS as of June 30, 2013 and December 31, 2012 follows:

	June 30, 2013 Significant Inputs				December 31, 2012 Significant Inputs			
	Weighted Average Discount Rate	CPR Range	CDR	Loss Severity	Weighted Average Discount Rate	CPR Range	CDR	Loss Severity
Non-Agency RMBS								
Senior	7.0%	6% - 6%	0% - 0%	50% - 50%	7.5%	11% - 11%	0% - 3%	50% - 58%
Senior interest-only	11.6%	1% - 28%	0% - 22%	50% - 85%	13.9%	1% - 25%	0% - 25%	50% - 85%
Subordinated	27.8%	1% - 20%	0% - 22%	50% - 85%	25.9%	1% - 18%	0% - 21%	50% - 85%
Subordinated interest-only	15.9%	4% - 13%	0% - 20%	50% - 64%	13.3%	4% - 11%	0% - 21%	50% - 68%
RMBS transferred to consolidated VIEs	5.2%	1% - 20%	0% - 32%	50% - 85%	5.8%	1% - 15%	0% - 36%	50% - 85%

All of the significant inputs listed have some degree of market observability, based on the Company's knowledge of the market, information available to market participants, and use of common market data sources. Collateral default and loss severity projections are in the form of "curves" that are updated quarterly to reflect the Company's collateral cash flow projections. Methods used to develop these projections conform to industry conventions. The Company uses assumptions it considers its best estimate of future cash flows for each respective security.

The discount rates applied to the expected cash flows to determine fair value are derived from a range of observable prices on securities backed by similar collateral. As the market becomes more or less liquid, the availability of these observable inputs will change.

The prepayment speed specifies the percentage of the collateral balance that is expected to pay off at each point in the future. The prepayment speed is based on factors such as collateral FICO score, loan-to-value ratio, debt-to-income ratio, and vintage on a loan level basis and is scaled up or down to reflect recent collateral-specific prepayment experience as obtained from remittance reports and market data services.

Default vectors are determined from the current "pipeline" of loans that are more than 30 days delinquent, in foreclosure, bankruptcy, or are real estate owned ("REO"). These delinquent loans determine the first 30 months of the default curve. Beyond month 30, the default curve transitions to a value that is reflective of a portion of the current delinquency pipeline.

The curve generated to reflect the Company's expected loss severity is based on collateral-specific experience with consideration given to other mitigating collateral characteristics. Characteristics such as seasoning are taken into consideration because severities tend to initially increase on newly originated securities, before beginning to decline as the collateral ages and eventually stabilizes. Collateral characteristics such as loan size, loan-to-value, and geographic location of collateral also effect loss severity.

Securitized Loans Held for Investment

The Company carries securitized loans held for investment at principal value, plus unamortized premiums, less unaccreted discounts and an allowance for loan losses. The Company estimates the fair value of its securitized loans held for investment by considering the loan characteristics, including the credit characteristics of the borrower, purpose of the loan, use of the collateral securing the loan, and management's expectations of general economic conditions in the sector and greater economy.

Repurchase Agreements

Repurchase agreements are collateralized financing transactions utilized by the Company to acquire investment securities. Due to the short term nature of these financial instruments, the Company estimates the fair value of these repurchase agreements using the contractual obligation plus accrued interest payable at maturity.

Securitized Debt, Non-Agency RMBS Transferred to Consolidated VIEs and Securitized Debt, Loans Held for Investment

The Company records securitized debt for certificates or notes financed without recourse to the Company in securitization or re-securitization transactions treated as secured borrowings. The Company carries securitized debt at the principal balance outstanding plus unamortized premiums, less unaccreted discounts recorded in connection with the financing of the loans or RMBS with third parties. The premiums or discounts associated with the financing of the notes or certificates are amortized over the contractual life of the instrument using the interest method. The Company estimates the fair value of securitized debt by estimating the future cash flows associated with the underlying assets collateralizing the secured debt outstanding. The Company models the fair value of each underlying asset by considering, among other items, the structure of the underlying security, coupon, servicer, actual and expected defaults, actual and expected default severities, reset indices, and prepayment speeds in conjunction with market research for similar collateral performance and management's expectations of general economic conditions in the sector and other economic factors.

The following table presents the carrying value and fair value, as described above, of the Company's financial instruments not carried at fair value on a recurring basis at June 30, 2013 and December 31, 2012.

	June 30, 2013 (dollars in thousands)		
	Level in Fair Value Hierarchy	Carrying Amount	Fair Value
Securitized loans held for investment	3	924,566	908,018
Repurchase agreements	2	(1,478,141)	(1,480,522)
Securitized debt, collateralized by Non-Agency RMBS	3	(1,128,752)	(1,143,819)
Securitized debt, collateralized by loans held for investment	3	(805,229)	(797,602)

	December 31, 2012 (dollars in thousands)		
	Level in Fair Value Hierarchy	Carrying Amount	Fair Value
Securitized loans held for investment	3	1,300,131	1,320,696
Repurchase agreements	2	(1,528,025)	(1,531,511)
Securitized debt, collateralized by Non-Agency RMBS	3	(1,336,261)	(1,334,551)
Securitized debt, collateralized by loans held for investment	3	(1,169,710)	(1,194,747)

6. Repurchase Agreements

The Company had outstanding \$1.5 billion and \$1.5 billion of repurchase agreements with weighted average borrowing rates of 0.43% and 0.52% and weighted average remaining maturities of 69 days and 56 days as of June 30, 2013 and December 31, 2012, respectively. At June 30, 2013 and December 31, 2012, Agency RMBS pledged as collateral under these repurchase agreements had an estimated fair value of \$1.6 billion, respectively. The average daily balances of the Company's repurchase agreements for the six months ended June 30, 2013 and the year ended December 31, 2012 were \$1.4 billion and \$2.1 billion, respectively. The interest rates of these repurchase agreements are generally indexed to the one-month or the three-month LIBOR rate and re-price accordingly.

At June 30, 2013 and December 31, 2012, the repurchase agreements collateralized by Agency RMBS had the following remaining maturities.

	June 30, 2013	December 31, 2012
	(dollars in thousands)	
Overnight	\$ 6,655	\$ -
1-29 days	771,163	732,809
30 to 59 days	514,872	325,915
60 to 89 days	-	-
90 to 119 days	-	211,137
Greater than or equal to 120 days	185,451	258,164
Total	\$ 1,478,141	\$ 1,528,025

At June 30, 2013 and December 31, 2012, the Company did not have an amount at risk under its repurchase agreements greater than 10% of its equity with any counterparty.

7. Securitized Debt

All of the Company's securitized debt is collateralized by residential mortgage loans or Non-Agency RMBS. For financial reporting purposes, the Company's securitized debt is accounted for as secured borrowings. Thus, the residential mortgage loans or RMBS held as collateral are recorded in the assets of the Company as securitized loans held for investment or Non-Agency RMBS transferred to consolidated VIEs and the securitized debt is recorded as a non-recourse liability in the accompanying Consolidated Statements of Financial Condition.

At June 30, 2013 the Company's securitized debt collateralized by residential mortgage loans had a principal balance of \$806.5 million. The debt matures between the years 2023 and 2042. At June 30, 2013 the debt carried a weighted average cost of financing equal to 3.35%. At December 31, 2012 the Company's securitized debt collateralized by residential mortgage loans had a principal balance of \$1.2 billion. The debt matures between the years 2023 and 2042. At December 31, 2012 the debt carried a weighted average cost of financing equal to 3.37%.

At June 30, 2013 the Company's securitized debt collateralized by Non-Agency RMBS had a principal balance of \$1.2 billion. The debt matures between the years 2035 and 2047. At June 30, 2013 the debt carried a weighted average cost of financing equal to 4.36%. At December 31, 2012 the Company's securitized debt collateralized by Non-Agency RMBS had a principal balance of \$1.4 billion. The debt matures between the years 2035 and 2047. At December 31, 2012 the debt carried a weighted average cost of financing equal to 4.41%.

The carrying value of securitized debt is based on its amortized cost, net of premiums or discounts related to sales of senior certificates to third parties. The following table presents the estimated principal repayment schedule of the securitized debt at June 30, 2013 and December 31, 2012, based on expected cash flows of the residential mortgage loans or RMBS, as adjusted for projected losses on the underlying collateral of the debt. All of the securitized debt recorded in the Company's Consolidated Statements of Financial Condition is non-recourse to the Company.

	June 30, 2013	December 31, 2012
	(dollars in thousands)	
Within One Year	\$ 511,814	\$ 658,423
One to Three Years	640,811	793,150
Three to Five Years	327,256	430,993
Greater Than or Equal to Five Years	380,786	555,717
Total	\$ 1,860,667	\$ 2,438,283

Maturities of the Company's securitized debt are dependent upon cash flows received from the underlying loans. The estimate of their repayment is based on scheduled principal payments on the underlying loans. This estimate will differ from actual amounts to the extent prepayments and/or loan losses are experienced. See Notes 3 and 4 for a more detailed discussion of the securities and loans collateralizing the securitized debt.

8. Consolidated Securitization Vehicles and Other Variable Interest Entities

Since its inception, the Company has created VIEs for the purpose of securitizing whole mortgage loans or re-securitizing RMBS and obtaining permanent, non-recourse term financing. The Company evaluated its interest in each VIE to determine if it is the primary beneficiary.

The Company's accounting policy for accounting and consolidation considerations of VIEs is described in Note 2(a).

As of June 30, 2013, the Company's Consolidated Statements of Financial Condition includes ten consolidated VIEs with \$4.2 billion of assets and \$1.9 billion of liabilities. As of December 31, 2012, the Company's Consolidated Statements of Financial Condition includes ten consolidated VIEs with \$4.6 billion of assets and \$2.5 billion of liabilities.

VIEs for Which the Company is the Primary Beneficiary

The retained beneficial interests in VIEs for which the Company is the primary beneficiary are typically the subordinated tranches of these re-securitizations and in some cases the Company may hold interests in additional tranches. The result of consolidation at June 30, 2013 is the inclusion of \$3.2 billion of Non-Agency RMBS at fair value representing the underlying securities of the trusts, the inclusion of \$924.6 million of securitized loans held for investment, the recognition of \$1.1 billion of securitized debt associated with Non-Agency RMBS transferred to consolidated VIEs and \$805.2 million of securitized debt associated with loans held for investment. In addition, at June 30, 2013 the Company recognized \$20.1 million and \$6.5 million of accrued interest receivable and accrued interest payable, respectively, of the securitizations.

The table below reflects the assets and liabilities recorded in the Consolidated Statements of Financial Condition related to the consolidated VIEs as of June 30, 2013 and December 31, 2012.

	June 30, 2013	December 31, 2012
	(dollars in thousands)	
Assets		
Non-Agency RMBS transferred to consolidated VIEs	\$ 3,219,691	\$ 3,274,204
Securitized loans held for investment	924,566	1,300,131
Accrued interest receivable	20,136	24,082
Liabilities		
Securitized debt, collateralized by Non-Agency RMBS	\$ 1,128,752	\$ 1,336,261
Securitized debt, collateralized by loans held for investment	805,229	1,169,710
Accrued interest payable	6,494	8,358

Income and expense and OTTI amounts related to consolidated VIEs recorded in the Consolidated Statements of Operations and Comprehensive Income (Loss) is presented in the table below.

	For the Quarter Ended	
	June 30, 2013	June 30, 2012
	(dollars in thousands)	
Interest income, Assets of consolidated VIEs	\$ 93,936	\$ 109,493

VIEs for Which the Company is Not the Primary Beneficiary

The Company has interests in the following VIEs in addition to the RMBS described in Note 3.

The Company's involvement with VIEs for which it is not considered the primary beneficiary generally is in the form of owning securities issued by the trusts, similar to its investments in other RMBS that do not provide the Company with a controlling financial interest. The Company's maximum exposure to loss does not include other-than-temporary impairments or other write-downs that the Company previously recognized through earnings.

The table below represents the carrying amounts and classification of assets recorded on the Company's consolidated financial statements related to its variable interests in non-consolidated VIEs, as well as its maximum exposure to loss as a result of its involvement with these VIEs, which is represented by the fair value of the Company's investments in the trusts.

Total	\$ 1,046	\$ 2,860	\$ 1,851	\$ 3,480

9. Interest Rate Swaps

In connection with the Company's interest rate risk management strategy, the Company economically hedges a portion of its interest rate risk by entering into derivative financial instrument contracts in the form of interest rate swaps. The Company's swaps are used to lock in a fixed rate related to a portion of its current and anticipated payments on its repurchase agreements. The Company typically agrees to pay a fixed rate of interest ("pay rate") in exchange for the right to receive a floating rate of interest ("receive rate") over a specified period of time. These derivative financial instrument contracts are not designated as hedges for GAAP. The use of interest rate swaps creates exposure to credit risk relating to potential losses that could be recognized if the counterparties to these instruments fail to perform their obligations under the contracts. In the event of a default by the counterparty, the Company could have difficulty obtaining its RMBS pledged as collateral for swaps. The Company periodically monitors the credit of its counterparties to determine if it is exposed to counterparty credit risk. See Note 14 for further discussion of counterparty credit risk.

The table below summarizes the location and fair value of interest rate swaps reported in the Consolidated Statements of Financial Condition as of June 30, 2013 and December 31, 2012.

	Location on Consolidated Statements of Financial Condition	Notional Amount	Net Estimated Fair Value/Carrying Value	Net Estimated Fair Value of Agency RMBS Pledged as Collateral
(dollars in thousands)				
June 30, 2013	Liabilities	\$ 1,355,000	\$ (35,359)	\$ 37,719
December 31, 2012	Liabilities	\$ 1,355,000	\$ (53,939)	\$ 60,382

The effect of the Company's interest rate swaps on the Consolidated Statements of Operations and Comprehensive Income (Loss) is presented below.

	Location on Consolidated Statements of Operations and Comprehensive Income (Loss)	
	Net Unrealized Gains (Losses) on Interest Rate Swaps	Net Realized Gains (Losses) on Interest Rate Swaps
(dollars in thousands)		
For the Quarter Ended:		
June 30, 2013	\$ 13,178	\$ (5,391)
June 30, 2012	\$ (10,992)	\$ (5,194)
For the Six Months Ended:		
June 30, 2013	\$ 18,580	\$ (10,921)
June 30, 2012	\$ (10,180)	\$ (9,592)

The weighted average pay rate on the Company's interest rate swaps at June 30, 2013 was 1.81% and the weighted average receive rate was 0.19%. The weighted average pay rate on the Company's interest rate swaps at December 31, 2012 was 1.81% and the weighted average receive rate was 0.21%.

The following table summarizes the notional amounts and unrealized gains (losses) of interest rate swap contracts on a gross basis, amounts offset in accordance with netting arrangements and net amounts as presented in the Consolidated Statements of Financial Condition as of June 30, 2013 and December 31, 2012.

June 30, 2013 (dollars in thousands)				
	Interest Rate Swaps - Asset		Interest Rate Swaps - Liability

Gross Amounts	\$ -	\$ -	\$ 1,355,000	\$ 35,359
Amounts Offset	-	-	-	-
Netted Amounts	\$ -	\$ -	\$ 1,355,000	\$ 35,359

December 31, 2012 (dollars in thousands)				
	Interest Rate Swaps - Asset		Interest Rate Swaps - Liability	
	Notional	Unrealized Gains	Notional	Unrealized Losses
Gross Amounts	\$ -	\$ -	\$ 1,355,000	\$ 53,939
Amounts Offset	-	-	-	-
Netted Amounts	\$ -	\$ -	\$ 1,355,000	\$ 53,939

All of the Company's derivative contracts are subject to International Swaps and Derivatives Association Master Agreements ("ISDA") which contain provisions that grant counterparties certain rights with respect to the applicable ISDA upon the occurrence of (i) negative performance that results in a decline in net assets in excess of specified thresholds or dollar amounts over set periods of time, (ii) the Company's failure to maintain its REIT status, (iii) the Company's failure to comply with limits on the amount of leverage, and (iv) the Company's stock being delisted from the New York Stock Exchange (NYSE). Upon the occurrence of items (i) through (iv), the counterparty to the applicable ISDA has a right to terminate the ISDA in accordance with its provisions. The aggregate fair value of all derivative instruments with credit-risk-related contingent features that are in a net liability position at June 30, 2013 is approximately \$35.4 million including accrued interest, which represents the maximum amount the Company would be required to pay upon termination, which is fully collateralized.

10. Common Stock

On January 28, 2011 the Company entered into an equity distribution agreement with FIDAC and UBS Securities LLC ("UBS"). Through this agreement, the Company may sell through UBS, as its sales agent, up to 125,000,000 shares of its common stock in ordinary brokers' transactions at market prices or other transactions as agreed between the Company and UBS. The Company did not sell any shares of its common stock under the equity distribution agreement during the quarters and six months ended June 30, 2013 and 2012.

On September 24, 2009, the Company implemented a Dividend Reinvestment and Share Purchase Plan ("DRSPP"). The DRSPP provides holders of record of its common stock an opportunity to automatically reinvest all or a portion of their cash distributions received on common stock in additional shares of the Company's common stock as well as to make optional cash payments to purchase shares of its common stock. Persons who are not already stockholders may also purchase the Company's common stock under the plan through optional cash payments. The DRSPP is administered by the Administrator, Computershare. The DRSPP was suspended during the quarter ended March 31, 2012 when the Company was no longer current in its filings with the SEC. There were no shares issued as a part of the DRSPP during the quarter and six months ended June 30, 2013 due to the suspension of the DRSPP. During the six months ended June 30, 2012 the Company raised \$117 thousand by issuing 39,000 shares through the DRSPP. All 39,000 shares issued through the DRSPP were issued in the first quarter of 2012.

As a result of the Company's delay in filing its SEC reports by the filing date required by the SEC (including the grace period permitted by Rule 12b-25 under the Securities Exchange Act of 1934, as amended), the Company will not be able to issue shares of common stock under the equity distribution agreement or the DRSPP until filings with the SEC have been timely made for a full year.

During the quarter ended June 30, 2013 the Company declared dividends to common shareholders totaling \$92.4 million, or \$0.09 per share. During the quarter ended June 30, 2012 the Company declared dividends to common shareholders totaling \$92.4 million, or \$0.09 per share. During the six months ended June 30, 2013 the Company declared dividends to common shareholders totaling \$184.9 million, or \$0.18 per share. During the six months ended June 30, 2012 the Company declared dividends to common shareholders totaling \$205.4 million, or \$0.20 per share.

Earnings per share for the quarters and six months ended June 30, 2013 and 2012, respectively, are computed as follows:

	For the Quarter Ended

11. Accumulated Other Comprehensive Income

The following table presents the changes in the components of Accumulated Other Comprehensive Income ("AOCI") for the six months ended June 30, 2013:

	June 30, 2013	
	(dollars in thousands)	
	Unrealized gains (losses) on available- for-sale securities, net	Total Accumulated OCI Balance
Balance as of December 31, 2012	\$ 989,936	\$ 989,936
OCI before reclassifications	95,012	95,012
Amounts reclassified from AOCI	(47,960)	(47,960)
Net current period OCI	47,052	47,052
Balance as of June 30, 2013	\$ 1,036,988	\$ 1,036,988

The following table presents the details of the reclassifications from AOCI for the six months ended June 30, 2013:

Details about Accumulated OCI Components	June 30, 2013 (dollars in thousands)		Affected Line on the Consolidated Statements Of Operations And Comprehensive Income (Loss)
	Amounts Reclassified from Accumulated OCI		
Unrealized gains and losses on available-for-sale securities			
	\$ 54,123	Net realized gains (losses) on sales of investments	
	(6,163)	Net other-than-temporary credit impairment losses	
	\$ 47,960	Income (loss) before income taxes	
	-	Income taxes	
	\$ 47,960	Net of tax	

12. Long Term Incentive Plan

The Company has adopted a long term stock incentive plan to provide incentives to its independent directors and employees of FIDAC and its affiliates, to reward their efforts, to attract, reward and retain personnel and other service providers, and to align their interest with the common share investors. The incentive plan authorizes the Compensation Committee of the board of directors to grant awards, including incentive stock options, non-qualified stock options, restricted shares and other types of incentive awards. The specific award granted to an individual is based upon, in part, the individual's position within FIDAC, the individual's position within the Company, his or her contribution to the Company's performance, as well as the recommendations of FIDAC. The incentive plan authorizes the granting of options or other awards of 8.0% of the outstanding shares of the Company's common stock up to a ceiling of 40,000,000 shares.

On January 2, 2008, the Company granted restricted stock awards in the amount of 1,301,000 shares to employees of FIDAC and its affiliates and the Company's independent directors. The awards to the independent directors vested on the date of grant and the awards to FIDAC's employees vest quarterly over a period of 10 years. As of June 30, 2013 there was \$1.6 million of total unrecognized compensation costs related to non-vested share-based compensation arrangements granted under the long term incentive plan, based on the closing price of the shares at quarter end. That cost is expected to be recognized over a period of 4.5 years. The total fair value of shares vested, less those forfeited, during the quarters ended June 30, 2013 and 2012 was \$87 thousand and \$88 thousand, respectively, based on the closing price of the stock on the vesting date. The total fair value of shares vested, less those forfeited, during the six months ended June 30, 2013 and 2012 was \$160 thousand and \$170 thousand, respectively. For the quarters ended June 30, 2013 and 2012, compensation expense associated with the amortization of the fair value of the restricted stock was approximately \$94 thousand and \$88 thousand, respectively. For the six months ended June 30, 2013 and 2012, compensation expense associated with the amortization of the fair value of the restricted stock was approximately \$172 thousand and \$169 thousand, respectively.

The Company's independent directors receive a fixed dollar amount of the Company's common stock in return for services provided to the Company. Equity based awards granted to the independent directors vest during the year of service. For the quarters ended June 30, 2013 and 2012, the Company recognized \$75 thousand per quarter of stock based compensation to independent directors. For the six months ended June 30, 2013 and 2012, the Company recognized \$150 thousand per period of stock based compensation to independent directors.

The following table presents information with respect to the Company's restricted stock awards during the quarters and six months ended June 30, 2013 and 2012:

	June 30, 2013		June 30, 2012	
	Number of Shares	Weighted Average Grant Date Fair Value	Number of Shares	Weighted Average Grant Date Fair Value

Forfeited	(4,017)	17.72	(381)	17.72
Unvested shares outstanding - end of period	527,400	17.72	695,200	17.72

13. Income Taxes

For the six months ended June 30, 2013, the Company was qualified to be taxed as a REIT under Code Sections 856 through 860. As a REIT, the Company is not subject to federal income tax to the extent that it makes qualifying distributions of taxable income to its stockholders. To maintain qualification as a REIT, the Company must distribute at least 90% of its annual REIT taxable income to its shareholders and meet certain other requirements such as assets it may hold, income it may generate and its shareholder composition. It is generally the Company's policy to distribute to its shareholders all of the Company's taxable income.

The state and local tax jurisdictions for which the Company is subject to tax-filing obligations recognize the Company's status as a REIT, and therefore, the Company generally does not pay income tax in such jurisdictions. The Company may, however, be subject to certain minimum state and local tax filing fees and its TRS is subject to federal, state, and local taxes.

The Company did not recognize any income tax expense for each of the quarters ended June 30, 2013 and 2012. For each of the six months ended June 30, 2013 and 2012, the Company recorded income tax expense of \$2 thousand, respectively.

In general, common stock cash dividends declared by the Company will be considered ordinary income to stockholders for income tax purposes. From time to time, a portion of the Company's dividends may be characterized as capital gains or return of capital.

The Company's effective tax rate differs from its combined federal, state and city corporate statutory tax rate primarily due to the deduction of dividend distributions required to be paid under Code Section 857(a).

The Company's 2012, 2011 and 2010 federal, state and local tax returns remain open for examination.

14. Credit Risk and Interest Rate Risk

The Company's primary components of market risk are credit risk and interest rate risk. The Company is subject to interest rate risk in connection with its investments in Agency and Non-Agency RMBS, residential mortgage loans, and borrowings under repurchase agreements. When the Company assumes interest rate risk, it attempts to minimize interest rate risk through asset selection, hedging and matching the income earned on mortgage assets with the cost of related liabilities. The Company attempts to minimize credit risk through due diligence and asset selection by purchasing loans underwritten to agreed-upon specifications of selected originators. The Company has established a whole loan target market including prime borrowers with FICO scores generally greater than 650, Alt-A documentation, geographic diversification, owner-occupied property, and moderate loan-to-value ratios. These factors are considered to be important indicators of credit risk.

By using derivative hedging instruments and repurchase agreements, the Company is exposed to counterparty credit risk if counterparties to the contracts do not perform as expected. If a counterparty fails to perform on a derivative hedging instrument, the Company's counterparty credit risk is equal to the amount reported as a derivative asset on its balance sheet to the extent that amount exceeds collateral obtained from the counterparty or, if in a net liability position, the extent to which collateral posted exceeds the liability to the counterparty. The amounts reported as a derivative asset/(liability) are derivative contracts in a gain/(loss) position, and to the extent subject to master netting arrangements, net of derivatives in a loss/(gain) position with the same counterparty and collateral received/(pledged). If the counterparty fails to perform on a repurchase agreement, the Company is exposed to a loss to the extent that the fair value of collateral pledged exceeds the liability to the counterparty. The Company attempts to minimize counterparty credit risk by evaluating and monitoring the counterparty's credit, executing master netting arrangements and obtaining collateral, and executing contracts and agreements with multiple counterparties to reduce exposure to a single counterparty, where appropriate.

Our repurchase agreements and derivative transactions are governed by underlying agreements that provide for a right of setoff under master netting arrangements, including in the event of default or in the event of bankruptcy of either party to the transactions. We present our assets and liabilities subject to such arrangements on a net basis in our consolidated statements of financial condition. The following table presents information about our liabilities that are subject to such arrangements and can potentially be offset on our consolidated statements of financial condition as of June 30, 2013 and December 31, 2012. The Company has no financial instruments subject to master netting arrangements, or similar arrangements, in an asset position on a gross basis.

June 30, 2013 (dollars in thousands)

15. Management Agreement and Related Party Transactions

The Company entered into a management agreement with FIDAC, which provided for an initial term through December 31, 2010 with an automatic one-year extension option and subject to certain termination rights. The Compensation Committee of the Board of Directors renewed the management agreement through December 31, 2013. In 2011 and 2010, the Company paid FIDAC a quarterly management fee equal to 1.50% per annum of the gross Stockholders' Equity (as defined in the management agreement) of the Company. Effective November 28, 2012, the management fee was reduced to 0.75% per annum of gross Stockholders' Equity, which reduction will remain in effect until the Company is current on all of its filings required under applicable securities laws.

Management fees accrued and paid to FIDAC for the quarters ended June 30, 2013 and 2012 were \$6.5 million and \$12.9 million respectively. Management fees accrued and paid to FIDAC for the six months ended June 30, 2013 and 2012 were \$12.9 million and \$25.8 million respectively.

Under the management agreement, the Company is obligated to reimburse FIDAC for its costs incurred under the management agreement. In addition, the management agreement permits FIDAC to require the Company to pay for its pro rata portion of rent, telephone, utilities, office furniture, equipment, machinery and other office, internal and overhead expenses that FIDAC incurred in connection with the Company's operations. These expenses are allocated between FIDAC and the Company based on the ratio of the Company's proportion of gross assets compared to the gross assets managed by FIDAC as calculated at each quarter end. FIDAC and the Company will modify this allocation methodology, subject to the approval of the Company's board of directors if the allocation becomes inequitable (i.e., if the Company becomes very highly leveraged compared to FIDAC's other funds and accounts). During the quarter and six months ended June 30, 2013, the Company reimbursed FIDAC approximately \$129 thousand and \$228 thousand for such expenses, respectively. During the quarter and six months ended June 30, 2012, the Company reimbursed FIDAC approximately \$125 thousand and \$240 thousand for such expenses, respectively.

The Company and FIDAC amended the management agreement on March 8, 2013. In the amendment, the reduction in the management fee was memorialized. In addition, FIDAC agreed to pay all past and future expenses that the Company and/or the Audit Committee of the Company incur to: (1) evaluate the Company's accounting policy related to the application of GAAP to its Non-Agency RMBS portfolio (the "Evaluation"); (2) restate the Company's financial statements for the period covering 2008 through 2011 as a result of the Evaluation (the "Restatement Filing"); and (3) investigate and evaluate any shareholder derivative demands arising from the Evaluation and/or the Restatement Filing (the "Investigation"); provided, however, that FIDAC's obligation to pay expenses applies only to expenses not paid by the Company's insurers under its insurance policies. Expenses shall include, without limitation, fees and costs incurred with respect to auditors, outside counsel, and consultants engaged by the Company and/or the Audit Committee of the Company for the Evaluation, Restatement Filing and the Investigation. The amount paid by FIDAC related to these expenses for the quarter and six months ended June 30, 2013 is \$3.3 million and \$5.2 million, respectively, and is presented in the Consolidated Statements of Operations and Comprehensive Income (Loss) as Expense recoveries from Manager. There were no amounts paid by FIDAC related to these expenses for the quarter and six months ended June 30, 2012.

The amendment also provides that the independent directors or the holders of a majority of the outstanding shares of common stock (other than those held by Annaly or its affiliates) may elect to terminate the management agreement upon 30 days notice at any time in their sole discretion without the payment of a termination fee. The amendment also provides that the Company may terminate the management agreement effective immediately if (i) FIDAC engages in any act of fraud, misappropriation of funds, or embezzlement against the Company, (ii) there is an event of any gross negligence on the part of FIDAC in the performance of its duties under the management agreement, (iii) there is a commencement of any proceeding relating to FIDAC's bankruptcy or insolvency, (iv) there is a dissolution of FIDAC, or (v) FIDAC is convicted of (including a plea of nolo contendere) a felony.

On March 1, 2011, the Company entered into an administrative services agreement with RCap Securities Inc., ("RCap"). RCap is a SEC-registered broker-dealer and a wholly-owned subsidiary of Annaly that clears the Company's securities trades in return for normal and customary fees that RCap charges for such services. RCap may also provide brokerage services to the Company from time to time. During the quarter and six months ended June 30, 2013, fees paid to RCap were \$35 thousand and \$69 thousand, respectively. During the quarter and six months ended June 30, 2012, fees paid to RCap were \$29 thousand and \$73 thousand, respectively.

During the quarters ended June 30, 2013 and 2012, 29,300 shares and 31,600 shares of restricted stock issued by the Company to FIDAC's employees vested, respectively. During the six months ended June 30, 2013 and 2012, 58,600 shares and 63,200 shares of restricted stock issued by the Company to FIDAC's employees vested, respectively.

16. Commitments and Contingencies

From time to time, the Company may become involved in various claims and legal actions arising in the ordinary course of business. In connection with certain re-securitization transactions engaged in by the Company, the Company has the obligation under certain circumstances to repurchase assets from the VIE upon breach of certain representations and warranties. Management is not aware of any contingencies that require accrual or disclosure as of June 30, 2013 or December 31, 2012.

17. Subsequent Events

The Board of Directors declared and paid common stock cash dividends of \$0.09 per common share for the third and fourth quarters of 2013. The Board of Directors has also determined that there will be a regular quarterly dividend of \$0.09 per share for each of the first two quarters of 2014. The Board of Directors also declared a special dividend of \$0.20 per share paid on January 31, 2014 to shareholders of record on January 8, 2014. The special dividend may be characterized as a return of capital for federal income tax purposes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of the Company's ("we" or "our") financial condition and results of operations should be read in conjunction with the consolidated financial statements and notes to those statements included in Item 1 of this quarterly report on Form 10-Q.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

We make forward-looking statements in this report that are subject to risks and uncertainties. These forward-looking statements include information about possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives. When we use the words "believe," "expect," "anticipate," "estimate," "plan," "continue," "intend," "should," "may," "would," "will" or similar expressions, we intend to identify forward-looking statements. Statements regarding the following subjects, among others, are forward-looking by their nature:

- our business and investment strategy;
- our ability to maintain existing financing arrangements, obtain future financing arrangements and the terms of such arrangements, particularly in light of the delay of this filing and other matters discussed in this Form 10-Q;
- our ability to timely file our periodic reports with the Securities and Exchange Commission, or SEC;
- our expectations regarding materiality or significance;
- the effectiveness of our disclosure controls and procedures;
- material weaknesses in our internal controls over financial reporting;
- additional information that may arise from the preparation of our financial statements;
- inadequacy of or weakness in our internal controls over financial reporting of which we are not currently aware or which have not been detected;
- general volatility of the securities markets in which we invest;
- the impact of and changes to various government programs;
- our expected investments;
- changes in the value of our investments;
- interest rate mismatches between our investments and our borrowings used to finance such purchases;
- changes in interest rates and mortgage prepayment rates;
- effects of interest rate caps on our adjustable-rate investments;
- rates of default, delinquencies or decreased recovery rates on our investments;
- prepayments of the mortgage and other loans underlying our mortgage-backed securities, or RMBS, or other asset-backed securities, or ABS;
- the degree to which our hedging strategies may or may not protect us from interest rate volatility;
- the potential delisting of our common stock from the New York Stock Exchange, or NYSE;

- impact of and changes in governmental regulations, tax law and rates, accounting guidance, and similar matters;
- availability of investment opportunities in real estate-related and other securities;
- availability of qualified personnel;
- estimates relating to our ability to make distributions to our stockholders in the future;
- our understanding of our competition;
- market trends in our industry, interest rates, the debt securities markets or the general economy;
- our ability to maintain our classification as a real estate investment trust, or REIT, for federal income tax purposes; and
- our ability to maintain our exemption from registration under the Investment Company Act of 1940, as amended, or 1940 Act.

The forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. You should not place undue reliance on these forward-looking statements. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us. Some of these factors are described under the caption “Risk Factors” in our most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made. New risks and uncertainties arise from time to time, and it is impossible for us to predict those events or how they may affect us. Except as required by law, we are not obligated to, and do not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Unless otherwise indicated herein or as may be required by law, the disclosure included in this Form 10-Q is presented as of June 30, 2013. Accordingly, this Form 10-Q does not reflect all events occurring after June 30, 2013 (except as required by law, or as required by ASC 855, Subsequent Events), and we have not undertaken to update any item included in this Form 10-Q to reflect such events. Therefore, this Form 10-Q should be read in conjunction with our filings we have previously made with the SEC subsequent to June 30, 2013.

Executive Summary

We are a Maryland corporation that commenced operations on November 21, 2007. We acquire, either directly or indirectly through our subsidiaries, residential mortgage-backed securities, or RMBS, residential mortgage loans, commercial mortgage loans, real estate related securities and various other asset classes. We are externally managed by Fixed Income Discount Advisory Company, which we refer to as FIDAC or our Manager. FIDAC is a fixed-income investment management company that is registered as an investment adviser with the SEC. FIDAC is a wholly owned subsidiary of Annaly Capital Management, Inc., or Annaly. FIDAC has a broad range of experience in managing investments in Agency RMBS, which are mortgage pass-through certificates, collateralized mortgage obligations, or CMOs, and other RMBS representing interests in or obligations backed by pools of mortgage loans issued or guaranteed by Fannie Mae, Freddie Mac, and Ginnie Mae, Non-Agency RMBS, collateralized debt obligations, or CDOs, and other real estate related investments.

Our objective is to provide attractive risk-adjusted returns to our investors over the long-term, primarily through dividends and secondarily through capital appreciation. We intend to achieve this objective by investing in a diversified investment portfolio of RMBS, residential mortgage loans, real estate-related securities and various other asset classes, subject to maintaining our REIT status and exemption from registration under the 1940 Act. The RMBS, ABS, CMBS, and CDOs we purchase may include investment-grade and non-investment grade classes, including the BB-rated, B-rated and non-rated classes.

We rely on our Manager's expertise in identifying assets within our target asset classes. Our Manager makes investment decisions based on various factors, including expected cash yield, relative value, risk-adjusted returns, current and projected credit fundamentals, current and projected macroeconomic considerations, current and projected supply and demand, credit and market risk concentration limits, liquidity, cost of financing and financing availability, as well as maintaining our REIT qualification and our exemption from registration under the 1940 Act.

Over time, we will modify our investment allocation strategy as market conditions change to seek to maximize the returns from our investment portfolio. We believe this strategy, combined with our Manager's experience, will enable us to pay dividends and achieve capital appreciation through various changing interest rate and credit cycles and provide attractive long-term returns to investors.

Our targeted asset classes and the principal investments we have made and in which we may in the future invest are:

<u>Asset Class</u>	<u>Principal Investments</u>
RMBS	<ul style="list-style-type: none">• Non-Agency RMBS, including investment-grade and non-investment grade classes, including the BB-rated, B-rated and non-rated classes• Agency RMBS• Interest-only ("IO") RMBS
Residential Mortgage Loans	<ul style="list-style-type: none">• Prime mortgage loans, which are mortgage loans that conform to the underwriting guidelines of Fannie Mae and Freddie Mac, which we refer to as Agency Guidelines; and jumbo prime mortgage loans, which are mortgage loans that conform to the Agency Guidelines except as to loan size• Alt-A mortgage loans, which are mortgage loans that may have been originated using documentation standards that are less stringent than the documentation standards applied by certain other first lien mortgage loan purchase programs, such as the Agency Guidelines, but have one or more compensating factors such as a borrower with a strong credit or mortgage history or significant assets• FHA/VA insured loans, which are mortgage loans that comply with the underwriting guidelines of the Federal Housing Administration (FHA) or Department of Veteran Affairs (VA) and which are guaranteed by the FHA or VA, respectively• Mortgage servicing rights associated with residential mortgage loans, which reflect the value of the future stream of expected cash flows from the contractual rights to service a given pool of residential mortgage loans.

- Commercial Mortgage Loans
 - First or second lien loans secured by multifamily properties, which are residential rental properties consisting of five or more dwelling units; and mixed residential or other commercial properties; retail properties; office properties; or industrial properties, which may or may not conform to the Agency Guidelines
- Other Asset-Backed Securities
 - CMBS
 - Debt and equity tranches of CDOs
 - Consumer and non-consumer ABS, including investment-grade and non-investment grade classes, including the BB-rated, B-rated and non-rated classes
- Hedging Instruments
 - Swaps
 - Swaptions
 - Futures
 - Index options
 - Mortgage options

Since we commenced operations in November 2007, we have focused our investment activities on acquiring Non-Agency and Agency RMBS and on purchasing residential mortgage loans that have been originated by select originators, including the retail lending operations of leading commercial banks. Our investment portfolio at June 30, 2013 was weighted toward Non-Agency RMBS. At June 30, 2013, based on the outstanding principal balance of our interest earning assets, approximately 77.2% of our investment portfolio was Non-Agency RMBS, 16.1% of our investment portfolio was Agency RMBS, and 6.7% of our investment portfolio was securitized residential mortgage loans. At December 31, 2012, based on the outstanding principal balance of our interest earning assets, approximately 74.6% of our investment portfolio was Non-Agency RMBS, 14.7% of our investment portfolio was Agency RMBS, and 10.7% of our investment portfolio was securitized residential mortgage loans. We expect that over the near term, our investment portfolio will continue to be weighted toward Non-Agency RMBS, subject to maintaining our REIT qualification and our 1940 Act exemption.

We have engaged in transactions with residential mortgage lending operations of leading commercial banks and other originators in which we identified and re-underwrote residential mortgage loans owned by such entities, and purchased and securitized such residential mortgage loans. In the past we have also acquired formerly AAA-rated Non-Agency RMBS and immediately re-securitized those securities. We sold the resulting AAA-rated super senior RMBS and retained the rated or unrated mezzanine RMBS.

Our investment strategy is intended to take advantage of opportunities in the current interest rate and credit environment. We expect to adjust our strategy to changing market conditions by shifting our asset allocations across these various asset classes as interest rate and credit cycles change over time. We believe that our strategy, combined with FIDAC's experience, will enable us to pay dividends and achieve capital appreciation throughout changing market cycles. We expect to take a long-term view of assets and liabilities, and our reported earnings and estimates of the fair value of our investments at the end of a financial reporting period will not significantly impact our objective of providing attractive risk-adjusted returns to our stockholders over the long-term.

We use leverage to seek to increase our potential returns and to finance the acquisition of our assets. Our income is generated primarily by the difference, or net spread, between the income we earn on our assets and the cost of our borrowings. We expect to finance our investments using a variety of financing sources including, when available, repurchase agreements, warehouse facilities and securitizations. We may manage our debt and interest rate risk by utilizing interest rate hedges, such as interest rate swaps, caps, options and futures to reduce the effect of interest rate fluctuations related to our financing sources.

We have elected and believe we are organized and have operated in a manner that qualifies us to be taxed as a REIT under the Code. A REIT generally will not be subject to federal income tax on taxable income that is distributed to stockholders. Furthermore, substantially all of our assets consist of qualified REIT real estate assets (of the type described in Code Section 856(c)(5)). We calculate that at least 75% of our assets were qualified REIT assets, as defined in the Code, for the six months ended June 30, 2013 and the year ended December 31, 2012. We also calculate that our revenues qualified for the 75% REIT income test and for the 95% REIT income test for the six month periods ended June 30, 2013 and 2012. We also met all REIT requirements regarding the ownership of our common stock and the distribution of our REIT taxable income. Therefore, for the six months ended June 30, 2013 and the year ended December 31, 2012, we believe that we qualified as a REIT under the Code.

We operate our business to be exempt from registration under the 1940 Act, and therefore we are required to invest a substantial majority of our assets in loans secured by mortgages on real estate and real estate-related assets. Subject to maintaining our REIT qualification and our 1940 Act exemption, we do not have any limitations on the amounts we may invest in any of our targeted asset classes.

Looking forward, we cannot predict the percentage of our assets that will be invested in each asset class or whether we will invest in other classes of investments. We may change our investment strategy and policies without a vote of our stockholders.

Trends

We expect the results of our operations to be affected by various factors, many of which are beyond our control. Our results of operations will primarily depend on, among other things, the level of our net interest income, the market value of our assets, and the supply of and demand for such assets. Economic trends, both macro as well as those directly affecting the residential housing market, and the supply and demand of RMBS may affect our operations and financial results. We also evaluate market information regarding current residential mortgage loan underwriting criteria and loan defaults to manage our portfolio of assets, leverage, and debt. Our net interest income, which reflects the amortization of purchase premiums and accretion of discounts, varies primarily as a result of changes in interest rates, borrowing costs, credit impairment losses, and prepayment speeds, which is a measurement of how quickly borrowers pay down the unpaid principal balance on their mortgage loans. Further description of these factors is provided below.

Prepayment Speeds. Prepayment speeds, as reflected by the Constant Prepayment Rate, or CPR, vary according to interest rates, the type of investment, conditions in financial markets, and other factors, none of which can be predicted with any certainty. In general, when interest rates rise, it is relatively less attractive for borrowers to refinance their mortgage loans, and as a result, prepayment speeds tend to decrease. When interest rates fall, prepayment speeds tend to increase. For mortgage loan and RMBS investments purchased at a premium, as prepayment speeds increase, the amount of income we earn decreases as the purchase premium on the bonds amortizes faster than expected. Conversely, decreases in prepayment speeds result in increased income and can extend the period over which we amortize the purchase premium.

For mortgage loan and RMBS investments purchased at a discount, as prepayment speeds increase, the amount of income we earn increases from the acceleration of the accretion of the discount into interest income. Conversely, decreases in prepayment speeds result in decreased income as the accretion of the purchase discount into interest income occurs over a longer period. Recently, the correlation between interest rates and prepayment has not followed normal trends for certain asset classes. Due to economic hardship, some borrowers have been unable to refinance their loans as underwriting standards are more stringent and credit conditions remain restrictive.

Rising Interest Rate Environment. As indicated above, as interest rates rise, prepayment speeds generally decrease. Rising interest rates, however, increase our financing costs which may result in a net negative impact on our net interest income. In addition, if we acquire Agency and Non-Agency RMBS collateralized by monthly reset adjustable-rate mortgages, or ARMs, and three- and five-year hybrid ARMs, such interest rate increases could result in decreases in our net investment income, as the increase in our adjustable rate assets may increase slower than our adjustable rate financing. We expect that our fixed-rate assets would decline in value in a rising interest rate environment and that our net interest spreads on fixed rate assets could decline in a rising interest rate environment to the extent such assets are financed with floating rate debt.

Credit Risk. One of our strategic focuses is on acquiring distressed Non-Agency RMBS that have been downgraded because of defaults in the mortgages collateralizing such RMBS. When we acquire such RMBS we attempt to purchase it at a price such that its loss-adjusted return profile is in line with our targeted yields. We retain the risk of potential credit losses on all of the residential mortgage loans we hold in our portfolio as well as all of the Non-Agency RMBS. We attempt to mitigate credit risk in the asset selection process. Prior to the purchase of investments, we conduct a credit-risk based analysis of the collateral securing our investment that includes examining borrower characteristics, geographic concentrations, current and projected delinquencies, current and projected severities, and actual and expected prepayment speeds among other characteristics to estimate expected losses. We also acquire assets which we believe to be of high credit quality.

Size of Investment Portfolio. The size of our investment portfolio, as measured by the aggregate unpaid principal balance of our mortgage loans and aggregate principal balance of our mortgage related securities and the other assets we own, is also a key revenue driver. Generally, as the size of our investment portfolio grows, the amount of interest income we receive increases. The larger investment portfolio, however, may result in increased expenses if we incur additional interest expense to finance the purchase of our assets.

Critical Accounting Policies and Estimates

We prepare our financial statements in accordance with accounting principles generally accepted in the United States, or GAAP, which requires the use of estimates and assumptions. Management has discussed and reviewed the development, selection, and disclosure of critical accounting estimates with the Company's Audit Committee. Management believes that the most critical accounting policies and estimates, since these estimates require significant judgment, are interest income and other-than-temporary impairment, or OTTI, on Non-Agency RMBS, the determination of the appropriate accounting model for Non-Agency RMBS, the impact of default and prepayment assumptions on RMBS, and fair value measurements. Financial results could be materially different if other methodologies were used or if management modified its assumptions.

For a discussion of the Company's critical accounting policies and estimates, see "Critical Accounting Policies and Estimates" in Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Recent Accounting Pronouncements

Refer to Note 2(q) in the Notes to Consolidated Financial Statements for a discussion of accounting guidance recently adopted by the Company.

Financial Condition

Estimated Economic Book Value

This Management Discussion and Analysis section contains analysis and discussion of financial information that utilizes or presents ratios based on GAAP book value. The table and discussion below present our estimated economic book value. We calculate and disclose this non-GAAP measurement because we believe it represents an estimate of the fair value of the assets we own or are able to dispose of, pledge, or otherwise monetize. The estimated economic book value should not be viewed in isolation and is not a substitute for book value computed in accordance with GAAP.

GAAP requires us to consolidate certain securitizations and re-securitization transactions where we have determined that we are the primary beneficiary. In these transactions, we transferred assets to the trusts, which issued tranches of senior and subordinate notes or certificates. We sold the senior tranches and therefore have no continuing involvement in these trusts other than being a holder of notes or certificates issued by the trusts, with the same rights as other holders of the notes or certificates, except as it relates to CSMC 2012-CIM1, CSMC 2012-CIM2 and CSMC 2012-CIM3. As it relates solely to CSMC 2012-CIM1, CSMC 2012-CIM2 and CSMC 2012-CIM3, we have the ability to approve loan modifications and determine the course of action to be taken as it relates to loans in technical default, including whether or not to proceed with foreclosure. The notes and certificates we own that were issued by the trusts are largely subordinated interests in those trusts. The trusts have no recourse to our assets other than pursuant to a breach by us of the transaction documents related to the transfer of the assets by us to the trusts, but are presented as if we own 100% of the trust.

For re-securitized RMBS transactions and loan securitizations, we present the pre-securitized assets transferred into the consolidated trusts in our Consolidated Statements of Financial Condition as Non-Agency RMBS transferred to consolidated VIEs or Securitized loans held for investment. Post securitization RMBS assets sold are presented as liabilities in our Consolidated Statements of Financial Condition as Securitized debt, collateralized by Non-Agency RMBS and Securitized debt, collateralized by loans held for investment. We have presented the underlying securities we transferred to the trusts for the calculation of GAAP book value at fair value and recorded the corresponding liability for the notes or certificates sold to third parties at amortized cost. Fair value adjustments that are not credit related are recorded in Other comprehensive income (loss). Credit related impairments are deemed other-than-temporary and are recorded in earnings.

Because we are unable to dispose of, monetize or pledge the RMBS or loans we transferred into the trusts, we also present our estimated economic book value. We believe this measure represents the estimated value of the securities issued by these trusts that we own. In contrast to GAAP book value, our estimated economic book value considers only the assets we own or are able to dispose of, pledge, or otherwise monetize. To determine our estimated economic book value, we consider only the fair value of the notes or certificates issued by the securitization and re-securitization trusts that we actually own. Accordingly, our estimated economic book value does not include assets or liabilities for which we have no direct ownership, specifically the notes or certificates of the securitization and re-securitization trusts that were sold to third parties.

At June 30, 2013 the difference between GAAP book value and estimated economic book value was determined to be \$529.5 million. At December 31, 2012 the difference between GAAP book value and estimated economic book value was determined to be \$416.1 million. This difference is primarily driven by the value of the RMBS assets we have retained in these re-securitization transactions as compared to the value of consolidated loans and securities net of RMBS assets sold and recorded at amortized cost in these transactions. In these re-securitization transactions, we retained the subordinated, typically non-rated, first loss notes or certificates issued by the securitization trusts. These securities are complex, typically locked out as to principal repayment, relatively illiquid, and do not necessarily appreciate or depreciate in tandem with the broader Non-Agency RMBS market or with the loans on securities owned by the trusts. The tables below present the adjustments to GAAP book value that we believe are necessary to adequately reflect our calculation of estimated economic book value as of June 30, 2013 and December 31, 2012.

Total liabilities and stockholders' equity	\$ 7,742,489	\$ (2,922,029)	\$ 4,820,460
Book Value Per Share	\$ 3.45	\$ (0.40)	\$ 3.05

Our estimate of economic book value has important limitations. Our estimate of fair value is as of a point in time and subject to significant judgment, primarily the estimate of the fair value of the securities issued by the trusts which we own and can freely sell or pledge. Should we sell the assets in our portfolio, we may realize materially different proceeds from the sale than we have estimated as of the reporting date.

The calculation of estimated economic book value described above is used by management to understand the fair value of the assets we own and the liabilities for which we are legally obligated, and is presented for informational use only. The estimated economic book value should not be viewed in isolation and is not a substitute for book value computed in accordance with GAAP.

Portfolio Review

During the six month period ended June 30, 2013, on an aggregate basis, we purchased \$1.1 billion, sold \$429.6 million, and received \$902.2 million in principal payments related to our Agency and Non-Agency RMBS. Securitized loans decreased to \$924.6 million at June 30, 2013 from \$1.3 billion at December 31, 2012, primarily due to principal repayments of \$367.8 million during the six month period ended June 30, 2013. These principal payments were consistent with management's expectations.

The following table summarizes certain characteristics of our portfolio at June 30, 2013 and December 31, 2012.

	June 30, 2013		December 31, 2012	
	(dollars in thousands)			
Interest earning assets at period-end *	\$	6,968,497	\$	7,068,036
Interest bearing liabilities at period-end	\$	3,412,122	\$	4,033,996

(1) Bond Equivalent Yield at period end. Weighted Average Yield is calculated using each investment's respective amortized cost.

(2) Calculated based on reported losses to date, utilizing widest data set available (i.e., life-time losses, 12-month loss, etc.).

Based on the projected cash flows for our Non-Agency RMBS that are not of high credit quality, a portion of the original purchase discount is designated as Accretable Discount, which reflects the purchase discount expected to be accreted into interest income, and a portion is designated as Non-Accretable Difference, which represents the contractual principal on the security that is not expected to be collected. The amount designated as Non-Accretable Difference may be adjusted over time, based on the actual performance of the security, its underlying collateral, actual and projected cash flow from such collateral, economic conditions and other factors. If the performance of a security is more favorable than previously estimated, a portion of the amount designated as Non-Accretable Difference may be accreted into interest income over time. Conversely, if the performance of a security is less favorable than previously estimated, the amounts designated as Non-Accretable Difference may increase, resulting in an OTTI loss.

The following table presents changes to Accretable Discount and Non-Accretable Difference as it pertains to our entire Non-Agency RMBS portfolio for assets with purchase discounts.

	June 30, 2013	March 31, 2013	For the Quarter Ended December 31, 2012	September 30, 2012	June 30, 2012

Income (loss) before income taxes	143,207	40,781	223,010	121,016
Income taxes	-	-	2	2
Net income (loss)	\$ 143,207	\$ 40,781	\$ 223,008	\$ 121,014

Our net income increased by \$102.4 million for the three month period ended June 30, 2013 as compared to June 30, 2012. Our earnings per share on both a basic and diluted basis was \$0.14 per share and \$0.04 per share for the quarters ended June 30, 2013 and 2012.

Our net income increased by \$102.0 million for the six month period ended June 30, 2013 as compared to June 30, 2012. Our earnings per share on both a basic and diluted basis was \$0.22 per share and \$0.12 per share for the six months ended June 30, 2013 and 2012.

Net interest income (expense) declined by \$38.6 million to \$101.0 million in the second quarter of 2013 from \$139.6 million in second quarter 2012. This decrease was driven in part by a decline in general interest income of \$18.4 million to \$33.6 million in the second quarter of 2013 from \$52.0 million in the same period of 2012. This decline was the result of a change in the investment portfolio holdings as we reduced our holdings in Agency RMBS from the second quarter of 2013 to the current period. In addition, net interest income on our assets of consolidated VIEs declined by \$21.1 million from \$90.0 million for the three month period ended June 30, 2012 to \$68.9 million for the three month period ended June 30, 2013. This decline was primarily due to declines in our investment assets of our consolidated VIEs, due to the repayment of principal on the portfolio as compared to the prior year.

Net interest income (expense) declined by \$54.9 million to \$197.9 million for the six month period ended June 30, 2013 from \$252.9 million for the same period of 2012. This decrease was primarily driven by a decline in general interest income of \$40.7 million to \$62.7 million for the six months ended June 30, 2013 from \$103.4 million in the same period of 2012. This decline was the result of a change in the investment portfolio holdings as we reduced our holdings in Agency RMBS in 2012 and 2013 as well as paydowns received on our Non-Agency RMBS held in our consolidated VIEs.

During the three months ended June 30, 2013 net OTTI impairment losses declined by \$65.7 million over the same period of 2012 as we had no impairment losses for the quarter ended June 30, 2013. During the six months ended June 30, 2013 net OTTI impairment losses declined by \$107.9 million over the same period of 2012. The decrease in OTTI is attributable to improving fair values as well as favorable changes in cash flows expected to be collected. The favorable change in cash flows is mainly attributable to improvements in expected cash flow of our Non-Agency RMBS, and increasing prepayment speeds, which result in an increase in the present value of cash flows expected to be collected.

OTTI charges, recognized on our Non-Agency RMBS, reflect changes in our estimate of the amount and timing of cash flows expected to be collected. At June 30, 2013, we had a gross unrealized loss of \$38.7 million related to Agency RMBS and a gross unrealized loss of \$2.2 million related to Non-Agency RMBS, excluding senior and subordinated IOs which are carried at fair value with changes in fair value recognized in earnings. Impairments on Agency RMBS in an unrealized loss position at June 30, 2013 are considered temporary and not credit related as we expect to recover all contractual cashflows and do not anticipate the need to sell these securities prior to their recovery. Unrealized losses on Non-Agency RMBS subject to potential impairment for which no OTTI was recorded during the quarter are also considered temporary based on an estimate of the cash flows expected to be collected for such RMBS, which considers recent bond performance and expected future performance of the underlying collateral. Significant judgment is used in estimating both our cash flows expected to be collected for its Non-Agency RMBS and the credit component of OTTI. Refer to "Significant Accounting Policies" in the accompanying notes to the consolidated financial statements for more information regarding the recognition of OTTI.

Net income also increased as we recorded net gains on our interest rate swaps of \$7.8 million for the three months ended June 30, 2013 as compared to a net loss of \$16.2 million recorded for the same period of 2012. For the six months ended June 30, 2013, we recognized a net gain on our interest rate swaps of \$7.7 million compared to a net loss of \$19.8 million recorded for the same period of 2012. All changes in fair value of our interest rate swaps are recorded in earnings. The net gains on the interest rate swaps is due to rising interest rates, primarily in the second quarter of 2013.

In the second quarter of 2013, we realized gains on the sale of investment securities of \$54.1 million. We had no realized gains in the second quarter of 2012. These gains were primarily generated from sales of Non-Agency RMBS securities to take advantage of market conditions in our investment portfolio. For the six month periods ended June 30, 2013 and 2012, we recognized realized gains of \$54.1 million and \$16.0 million. We did not sell any securities in an unrealized loss position during the first or second quarter of 2013 or 2012.

Management fees, net of expenses reimbursed by the manager, declined by \$9.7 million and \$18.0 million for the quarter and six months ended June 30, 2013 as compared to the same period of 2012, due to the reduction of management fees from our manager, FIDAC, as well as the agreement by our manager to reimburse us for certain costs. See further discussion of the changes to the FIDAC management agreement in our discussion of related party transactions below.

Results of Operations for the Three and Six Months Ended June 30, 2013 and 2012

Our primary source of income is interest income earned on our assets. Our economic net interest income equals interest income excluding interest earned on cash and cash equivalents less interest expense and realized losses on interest rate swaps. For the purpose of computing economic net interest income and ratios relating to cost of funds measures throughout this section, interest expense includes net interest payments on interest rate swaps, which is presented as Realized gains (losses) on interest rate swaps in our Consolidated Statements of Operations and Comprehensive Income. Interest rate swaps are used to hedge the increase in interest paid on repurchase agreements in a rising rate environment. Presenting the net contractual interest payments on interest rate swaps with the interest paid on interest-bearing liabilities reflects our total contractual interest payments. We believe this presentation is useful to investors because this presentation depicts the economic value of our investment strategy, by showing actual interest expense and net interest income. Where indicated, interest expense, including interest payments on interest rate swaps, is referred to as economic interest expense. Where indicated, net interest income reflecting interest payments on interest rate swaps, is referred to as economic net interest income.

The following table reconciles the GAAP and non-GAAP measurements reflected in the Management's Discussion and Analysis of Financial Condition and Results of Operations.

	GAAP Interest Income	GAAP Interest Expense	Add: Net Realized Losses on Interest Rate Swaps	Economic Interest Expense	GAAP Net Interest Income	Less: Net Realized Losses on Interest Rate Swaps	Economic Net Interest Income (1)
	(dollars in thousands)

For The Quarter Ended June 30, 2012	\$ 7,475,567	\$ 161,522	8.64%	\$ 4,918,927	\$ 27,147	2.21%	\$ 134,375	6.44%

(1) Excludes cash and cash equivalents.

(2) Includes effect of realized losses on interest rate swaps.

Our economic net interest income declined by \$38.8 million for the three months ended June 30, 2013 as compared to the same period of 2012. Our net interest spread, which equals the yield on our average assets for this period less the economic average cost of funds for the period, declined by 128 basis points for the quarter ended June 30, 2013 from the same period of 2012.

Our economic net interest income declined by \$56.3 million for the six months ended June 30, 2013 as compared to the same period of 2012. Our net interest spread for this period, declined by 64 basis points for the six months ended June 30, 2013 from the same period of 2012.

The decline in economic net interest rate spread for the three and six month periods is primarily due to the decrease in our average interest earning assets at a faster rate than the decline in our obligations, primarily due to paydowns on our Non-Agency RMBS held in our consolidated VIEs year over year. In addition, we incurred lower economic interest expense in the second quarter of 2012 as a result of a revision in our amortization of deferred financing costs and discounts on our secured debt, which will not recur in subsequent periods.

Interest Income and Average Earning Asset Yield

Our average earning assets decreased by \$1.7 billion for the quarter ended June 30, 2013 from the quarter ended June 30, 2012. Our interest income declined by \$34.0 million for the quarter ended June 30, 2013 from quarter ended June 30, 2012. Our average earning assets decreased by \$1.4 billion for the six months ended June 30, 2013 from the six months ended June 30, 2012. Our interest income declined by \$57.9 million for the six months ended June 30, 2013 from the six month period ended June 30, 2012. The yield on our portfolio increased by 16 and 11 basis points for the three and six months ended June 30, 2013 as compared to the same periods of 2012. The average earning assets decreased year over year as a result of repayments of principal on our interest earning assets, primarily the Non-Agency RMBS held in our consolidated VIEs. The yield on our assets has increased slightly due in part to improving credit on our Non-Agency RMBS as well as lower prepayments on our IO portfolio, resulting in higher yields.

Economic Interest Expense and the Cost of Funds

The borrowing rate at which we are able to finance our assets using repurchase agreements is typically correlated to LIBOR and the term of the financing. The table below shows our average debt balance, economic interest expense, average cost of funds (inclusive of realized losses on interest rate swaps), average one-month LIBOR, average six-month LIBOR, average one-month LIBOR relative to average six-month LIBOR, and average cost of funds relative to average one- and six- month LIBOR.

	Average Debt Balance	Economic Interest Expense (1)	Average Cost of Funds	Average One- Month LIBOR	Average Six- Month LIBOR	Average One- Month LIBOR Relative to Average Six- Month LIBOR	Average Cost of Funds Relative to Average One- Month LIBOR	Average Cost of Funds Relative to Average Six- Month LIBOR
(Ratios have been annualized, dollars in thousands)								
For The Quarter Ended June 30, 2013	\$ 3,516,698	\$ 32,002	3.64%	0.20%	0.42%	(0.23%)	3.44%	3.22%
For The Quarter Ended March 31, 2013	\$ 3,827,635	\$ 34,359	3.59%	0.26%	0.76%	(0.51%)	3.33%	2.83%
For The Year Ended December 31, 2012	\$ 4,466,695	\$ 146,781	3.29%	0.24%	0.69%	(0.45%)	3.05%	2.60%
For The Quarter Ended December 31, 2012	\$ 3,989,790	\$ 39,207	3.93%	0.21%	0.54%	(0.33%)	3.72%	3.39%
For The Quarter Ended September 30, 2012	\$ 4,441,463	\$ 39,654	3.57%	0.24%	0.71%	(0.47%)	3.34%	2.86%
For The Quarter Ended June 30, 2012	\$ 4,918,927	\$ 27,147	2.21%	0.24%	0.73%	(0.49%)	1.97%	1.47%

(1) Includes effect of realized losses on interest rate swaps.

Our average debt balance decreased by \$1.4 billion for the three months ended June 30, 2013 as compared to the three months ended June 30, 2012. Our average debt balance decreased by \$1.1 billion for the six months ended June 30, 2013 as compared to the six months ended June 30, 2012. The decline in the averaged borrowed funds is due primarily to a reduction in repurchase agreements year over year as well as repayments of our securitized debt collateralized by loans held for investment. This decline reflects our rebalancing of the portfolio from agency collateralized repurchase agreements to securitized debt collateralized by loans held for investment.

Economic interest expense increased by \$4.9 million for the three month period ended June 30, 2013 as compared to the same period of 2012. This increase is due to an increase in our average cost of funds of 143 and 76 basis points for the three and six month periods ended June 30, 2013 as compared to three and six month periods ended June 30, 2012. The average cost of funds increase is due primarily a one time revision to interest expense from the amortization of deferred financing costs and discounts on our secured debt in the second quarter of 2012 which will not recur in future periods. This revision reduced our average cost of funds during the second quarter of 2012.

Gains and Losses on Sales of Assets

During the three month period ended June 30, 2013, we sold RMBS with a carrying value of \$375.3 million for realized gains of \$54.1 million. We did not sell any securities during the three month period ended June 30, 2012. During the six month period ended June 30, 2013, we sold RMBS with a carrying value of \$374.5 million for realized gains of \$54.1 million. During the six month period ended June 30, 2012, we sold RMBS with a carrying value of \$63.0 million for realized gains of \$16.0 million. Capital gains from sales of securities are realized when management believes it is appropriate to sell a security. Management may decide to sell securities to reduce leverage in the portfolio, improve liquidity and take advantage of market conditions.

Secured Debt Financing Transactions

We did not re-securitize any RMBS or jumbo prime whole loans during the six month period ended June 30, 2013. During the six month period ended June 30, 2012, we financed the purchase of \$1.2 billion of jumbo prime whole loans by securitizing and selling senior bonds to third party investors for net proceeds of \$1.1 billion. We retained the subordinate tranches of the securitization.

Provision for Loan Losses

The provision for loan losses related to our securitized loans held for investment represents managements estimate of expected future losses on the securitized loans held. During the three month period ended June 30, 2013, the provision for loan losses decreased by \$1.7 million, net of principal writedowns on loans of \$677 thousand. The total loan loss reserve as of June 30, 2013 is \$9.6 million. During the six month period ended June 30, 2012, the provision for loan losses decreased by \$2.4 million. The decline in the loan loss provision is primarily due to lower delinquency rates on the mortgage pool general population used to estimate expected losses on the general mortgage loan portfolio. Management believes that the provision is sufficient to cover expected losses which may be incurred on the loan portfolio.

Management Fee and General and Administrative Expenses

The table below shows our total management fee and general and administrative, or G&A, expenses as compared to average total assets and average equity for the periods presented.

	Total Management Fee and G&A Expenses	Total Management Fee and G&A Expenses/Total Assets	Total Management Fee and G&A Expenses/Average Equity
(Ratios have been annualized, dollars in thousands)			
For The Quarter Ended June 30, 2013	\$ 8,380	0.46%	0.92%
For The Quarter Ended March 31, 2013	\$ 9,441	0.50%	1.05%
For The Year Ended December 31, 2012	\$ 58,799	0.76%	1.78%
For The Quarter Ended December 31, 2012	\$ 12,658	0.66%	1.45%
For The Quarter Ended September 30, 2012	\$ 15,799	0.80%	1.92%
For The Quarter Ended June 30, 2012	\$ 15,444	0.75%	1.95%

We paid FIDAC a management fee of \$6.5 million and \$12.9 million for the three months ended June 30, 2013 and 2012, respectively. We paid FIDAC a management fee of \$12.9 million and \$25.8 million for the six months ended June 30, 2013 and 2012, respectively. The management fee is based on our stockholders' equity as defined in the investment management agreement. The decrease in the management fee is due to the agreement to lower the management fee until all our SEC filings are current. See further discussion of the management fee and other agreements with FIDAC in our discussion of related party transactions below.

G&A expenses were \$5.2 million and \$2.5 million for the three months ended June 30, 2013 and 2012, respectively. G&A expenses were \$10.0 million and \$4.5 million for the six months ended June 30, 2013 and 2012, respectively. Our G&A expenses increased primarily due to increased legal and accounting fees as well as increased servicing fees associated with the CSMC 2012-CIM1, CSMC 2012-CIM2 and CSMC 2012-CIM3 securitizations.

Our Manager has agreed to pay all past and future expenses that we and/or our Audit Committee incur to: (1) evaluate our accounting policy related to the application of GAAP to our Non-Agency RMBS portfolio (the Evaluation); (2) restate our financial statements for the period covering 2008 through 2011 as a result of the Evaluation (the Restatement Filing); and (3) investigate and evaluate any shareholder derivative demands arising from the Evaluation and/or the Restatement Filing (the Investigation); provided, however, that our Manager's obligation to pay expenses applies only to expenses not paid by our insurers under our insurance policies. Expenses shall include, without limitation, fees and costs incurred with respect to auditors (to the extent such fees and costs exceed our originally estimated audit fees of \$542,400), outside counsel, and consultants engaged by us and/or our Audit Committee for the Evaluation, Restatement Filing and the Investigation. The amount paid by our Manager related to these expenses for the three and six months ended June 30, 2013 is \$3.3 million and \$5.2 million, respectively, and is presented in the Consolidated Statements of Operations and Comprehensive Income as Expense recoveries from Manager.

We reimburse FIDAC for our pro rata portion of rent, telephone, utilities, office furniture, equipment, machinery and other office, internal and overhead expenses of FIDAC and its affiliates required for our operations. During the three month periods ended June 30, 2013 and 2012, we reimbursed FIDAC approximately \$129 thousand and \$125 thousand for such expenses, respectively. During the six month periods ended June 30, 2013 and 2012, we reimbursed FIDAC approximately \$228 thousand and \$240 thousand for such expenses, respectively.

Net Income (Loss) and Return on Average Equity

Our net income was \$143.2 million and \$40.8 million for the three months ended June 30, 2013 and 2012, respectively. Our net income was \$223.0 million and \$121.0 million for the six months ended June 30, 2013 and 2012, respectively. Economic net interest income as a percentage of average equity decreased by 643 basis points for the three months ended June 30, 2013 as compared to the same period of 2012 and decreased by 490 basis points for the six month period ended June 30, 2013 as compared to the same period of 2012. The decline in our economic net interest income as a percentage of average equity is due to the lower yield on our average assets from the increase in securitized loans held for investment. The return on average equity increased by 10.6 points for the three months ended June 30, 2013 as compared to the same period of 2012 and increased by 482 basis points for the six month period ended June 30, 2013 as compared to the same period of 2012. The increase in our return on average equity is primarily due higher income as a result of realized gains on sales of investments and lower OTTI from the prior period. The table below shows our economic net interest income, realized gains (losses) on sale of assets and the credit related OTTI, realized and unrealized gains (losses) on interest rate swaps and IOs, total management fee and G&A expenses, and income tax, each as a percentage of average equity, and the return on average equity for the periods presented.

	Economic Net Interest Income/Average Equity *	Realized Gains (Losses) on Sales and OTTI/Average Equity	Realized and Unrealized Gains (Losses) on Interest Rate Swaps and IOs/Average Equity	Total Management Fee & G&A Expenses/Average Equity	Income Tax Benefit/Average Equity	Return on Average Equity
(Ratios have been annualized)						
For The Quarter Ended June 30, 2013	10.50%	6.14%	0.02%	(0.92%)	0.00%	15.73%
For The Quarter Ended March 31, 2013	10.17%	(0.73%)	0.49%	(1.05%)	0.00%	8.87%
For The Year Ended December 31, 2012	13.44%	(1.44%)	(0.26%)	(1.78%)	0.00%	9.95%
For The Quarter Ended December 31, 2012	10.85%	(1.03%)	0.68%	(1.45%)	0.00%	9.04%
For The Quarter Ended September 30, 2012	12.74%	7.11%	(2.40%)	(1.92%)	0.00%	15.53%
For The Quarter Ended June 30, 2012	16.93%	(8.14%)	(1.70%)	(1.95%)	0.00%	5.14%

* Includes the effect of realized losses on interest rate swaps

Exposure to European Financial Counterparties

A significant portion of our Agency RMBS is financed with repurchase agreements. We secure our borrowings under these agreements by pledging our Agency RMBS as collateral to the lender. The collateral we pledge exceeds the amount of the borrowings under each agreement, typically with the extent of over-collateralization being at least 3% of the amount borrowed. If the counterparty to the repurchase agreement defaults on its obligations and we are not able to recover our pledged assets, we are at risk of losing the over-collateralized amount. The amount of this exposure is the difference between the amount loaned to us plus interest due to the counterparty and the fair value of the collateral pledged by us to the lender including accrued interest receivable on such collateral.

We also use interest rate swaps to manage our interest rate risks. Under these swap agreements, we pledge Agency RMBS as collateral as part of a margin arrangement for interest rate swaps that are in an unrealized loss position. If a swap counterparty were to default on its obligation, we would be exposed to a loss to the extent that the amount of our Agency RMBS pledged exceeded the unrealized loss on the associated swaps and we were not able to recover the excess collateral.

Over the past several years, several large European financial institutions have experienced financial difficulty and have been either rescued by government assistance or by other large European banks or institutions. Some of these financial institutions or their U.S. subsidiaries have provided us financing under repurchase agreements or we have entered into interest rate swaps with such institutions. We have entered into repurchase agreements and/or interest rate swaps with six counterparties as of June 30, 2013 that are either domiciled in Europe or are a U.S.-based subsidiary of a European-domiciled financial institution. The following table summarizes our exposure to such counterparties at June 30, 2013:

Country	Number of Counterparties	Repurchase Agreement Financing	Interest Rate Swaps at Fair Value	Exposure (1)	Exposure as a Percentage of Total Assets
(dollars in thousands)					
France	1	163,851	\$ -	\$ 8,727	0.12%
Germany	1	-	(10,967)	1,054	0.01%
Netherlands	1	167,276	-	6,852	0.10%
Switzerland	2	354,559	(24,392)	20,450	0.28%
United Kingdom	1	132,824	-	4,743	0.07%
Total	6	\$ 818,510	\$ (35,359)	\$ 41,826	0.58%

(1) Represents the amount of securities pledged as collateral to each counterparty less the aggregate of repurchase agreement financing and unrealized loss on swaps for each counterparty.

At June 30, 2013, we did not use credit default swaps or other forms of credit protection to hedge the exposures summarized in the table above.

If the European credit crisis continues to impact these major European financial institutions, it is possible that it will also impact the operations of their U.S. subsidiaries. Our financings and operations could be adversely affected by such events. We monitor our exposure to our repurchase agreement and swap counterparties on a regular basis, using various methods, including review of recent rating agency actions, financial relief plans, credit spreads or other developments and by monitoring the amount of cash and securities collateral pledged and the associated loan amount under repurchase agreements and/or the fair value of swaps with our counterparties. We make reverse margin calls on our counterparties to recover excess collateral as permitted by the agreements governing our financing arrangements or interest rate swaps, or may try to take other actions to reduce the amount of our exposure to a counterparty when necessary.

Liquidity and Capital Resources

General

Liquidity measures our ability to meet cash requirements, including ongoing commitments to repay our borrowings, purchase RMBS, mortgage loans and other assets for our portfolio, pay dividends and other general business needs. Our principal sources of capital and funds for additional investments primarily include earnings from our investments, borrowings under securitizations and re-securitizations, repurchase agreements and other financing facilities, and proceeds from equity offerings.

To meet our short term (one year or less) liquidity needs, we expect to continue to borrow funds in the form of repurchase agreements and, subject to market conditions, other types of financing. The terms of the repurchase transaction borrowings under our master repurchase agreements generally conform to the terms in the standard master repurchase agreement as published by the Securities Industry and Financial Markets Association, or SIFMA, as to repayment, margin requirements and the segregation of all securities we have initially sold under the repurchase transaction. In addition, each lender typically requires that we include supplemental terms and conditions to the standard master repurchase agreement. Typical supplemental terms and conditions include changes to the margin maintenance requirements, cross default provisions, required haircuts (or the percentage that is subtracted from the value of RMBS that collateralizes the financing), purchase price maintenance requirements, and requirements that all disputes related to the repurchase agreement be litigated or arbitrated in a particular jurisdiction. These provisions may differ for each of our lenders.

We also expect to meet our short term liquidity needs by relying on the cash flows generated by our investments. These cash flows are primarily comprised of monthly principal and interest payments received on our investments. We may also sell our investments and utilize those proceeds to meet our short term liquidity needs or enter into non-recourse financing of our assets through sales of securities to third parties of loan securitization or RMBS re-securitization transactions that we have completed in prior periods.

Based on our current portfolio, leverage ratio and available borrowing arrangements, we believe our assets will be sufficient to enable us to meet anticipated short-term liquidity requirements. However, a decline in the value of our collateral could cause a temporary liquidity shortfall due to the timing of margin calls on the financing arrangements and the actual receipt of the cash related to principal paydowns. If our cash resources are at any time insufficient to satisfy our liquidity requirements, we may have to sell investments, potentially at a loss, or issue debt or additional equity securities in a common stock offering.

To meet our longer term liquidity needs (greater than one year), we expect our principal sources of capital and funds to continue to be provided by earnings from our investments, borrowings under securitizations and re-securitizations, repurchase agreements and other financing facilities, as well as proceeds from equity offerings. As a result of our failure to file our SEC filings by the filing date required by the SEC (including the grace period permitted by Rule 12b-25 under the Securities Exchange Act of 1934, as amended), we are not eligible to file a new Form S-3 registration statement or use our existing Form S-3 registration statements to raise additional equity capital until filings with the SEC have been timely made for a full year. Our ineligibility to use Form S-3 during this time period will have a negative impact on our ability to quickly access the public capital markets because we would be required to file a long-form registration statement and wait for the SEC to declare such registration statement effective.

In addition to the principal sources of capital described above, we may enter into warehouse facilities and use longer dated structured repurchase agreements. The use of any particular source of capital and funds will depend on market conditions, availability of these facilities, and the investment opportunities available to us.

Current Period

We held cash and cash equivalents of approximately \$168.2 million and \$621.2 million at June 30, 2013 and December 31, 2012, respectively.

Our operating activities provided net cash of approximately \$136.1 million and \$189.4 million for the six months ended June 30, 2013 and 2012, respectively. The cash provided by operating activities decreased for the six months ended June 30, 2013 when compared to the six months ended June 30, 2012 due primarily to a decrease in economic net interest income earned on the portfolio of \$56.3 million.

Our investing activities provided net cash of approximately \$222.4 million for the six months ended June 30, 2013 and resulted in the net use of cash of approximately \$467.8 million for the six months ended June 30, 2012. During the six months ended June 30, 2013 we generated cash primarily from principal payments of \$902.2 million related to all our investment assets and sales of RMBS of \$429.6 million offset in part by purchases of \$1.1 billion in RMBS securities. During the six months ended June 30, 2012, we used cash to purchase securitized loans related to the CSMC 2012-CIM1 and CSMC 2012-CIM2 transactions of \$1.2 billion and used cash to purchase RMBS securities of \$101.8 million. These uses of cash were offset in part by principal payments received of \$740.6 million and proceeds from sales of securities of \$79.1 million during the six months ended June 30, 2012.

Our financing activities resulted in the net use of cash of approximately \$811.5 million for the six months ended June 30, 2013 and provided net cash of approximately \$188.4 million for the six months ended June 30, 2012. During the six months ended June 30, 2013, we used cash to repay repurchase agreements, net of new borrowings of \$49.9 million. Other uses of cash for the six months ended June 30, 2013 included repayment of principal of our securitized debt of \$576.7 million and the payment of the dividends of \$184.9 million. During the six months ended June 30, 2012, we received proceeds from the issuance of debt related to the CSMC 2012-CIM1 and CSMC 2012-CIM2 securitizations of \$1.8 billion. This receipt of cash was offset in part by our use of cash to repay repurchase agreements of \$310.9 million, net of new borrowings. In addition we used cash for the repayments of debt on securitized borrowings of \$1.1 billion and the payment of dividends of \$225.9 million.

We expect to continue to finance our RMBS portfolio largely through repurchase agreements and loans through the securitization market. In addition, we may from time to time sell securities as a source of cash to fund new purchases.

At June 30, 2013 and December 31, 2012, the remaining maturities on our RMBS repurchase agreements were as follows.

	June 30, 2013	December 31, 2012
	(dollars in thousands)	
Overnight	\$ 6,655	\$ -
1-29 days	771,163	732,809
30 to 59 days	514,872	325,915
60 to 89 days	-	-
90 to 119 days	-	211,137
Greater than or equal to 120 days	185,451	258,164
Total	\$ 1,478,141	\$ 1,528,025

We collateralize the repurchase agreements we use to finance our operations with Agency RMBS. Our counterparties negotiate a 'haircut' when we enter into a financing transaction, which varies from lender to lender. The size of the haircut reflects the perceived risk associated with holding the RMBS by the lender. The haircut provides lenders with a cushion for daily market value movements that reduce the need for a margin call to be issued or margin to be returned as normal daily increases or decreases in RMBS market values occur. At June 30, 2013, the weighted average haircut on our repurchase agreements was 4.85%. Despite the haircut, repurchase agreements subject us to two types of margin calls. First, there are monthly margin calls that are triggered as principal payments and pre-payments are received by us as these payments lower the value of the collateral. As a result, we expect to receive margin calls from our repurchase counterparties monthly simply due to the principal paydowns on our Agency RMBS. The monthly principal payments and pre-payments are not known in advance and vary depending on the behavior of the borrowers related to the underlying mortgages. Second, counterparties make margin calls or return margin as a result of normal daily increases or decreases in asset fair values. In addition, when financing assets using standard form of SIFMA Master Repurchase Agreements, the counterparty to the agreement typically nets its exposure to us on all outstanding repurchase agreements and issues margin calls if movement of the fair values of the assets in the aggregate exceeds their allowable exposure to us. A decline in asset fair values could create a margin call, or may create no margin call depending on the counterparty's specific policy. In addition, counterparties consider a number of factors, including their aggregate exposure to us as a whole and the number of days remaining before the repurchase transaction closes prior to issuing a margin call. See Note 5 to our Consolidated Financial Statements for a discussion on how we determine the fair values of the RMBS collateralizing our repurchase agreements.

The table below presents our average repurchase balance and repurchase balance at each period end for the periods presented. Our balance at period-end tends to have little fluctuation from the average balances except in periods where we are adjusting the size of our portfolio by using leverage. Our average repurchase agreement balance at June 30, 2013 decreased compared to our average repurchase agreement balance for the quarter ended December 31, 2012 due to net repayments of our repurchase agreements financed from the sales of Agency RMBS during 2013. The Company continues to deploy capital to the strategic purchases of investments.

Period	Average Repurchase Balance	Repurchase Balance at Period End
	(dollars in thousands)	
Quarter Ended June 30, 2013	\$ 1,422,485	\$ 1,478,141
Quarter Ended March 31, 2013	\$ 1,460,629	\$ 1,420,375
Year Ended December 31, 2012	\$ 2,122,421	\$ 1,528,025
Quarter Ended December 31, 2012	\$ 1,567,605	\$ 1,528,025
Quarter Ended September 30, 2012	\$ 1,954,958	\$ 1,658,906
Quarter Ended June 30, 2012	\$ 2,412,827	\$ 2,362,088

We are not required to maintain any specific debt-to-equity ratio. We believe the appropriate leverage for the particular assets we are financing depends on the credit quality and risk of those assets. At June 30, 2013 and December 31, 2012 our total debt was approximately \$3.4 billion and \$4.0 billion, which represented a debt-to-equity ratio of approximately 0.9:1 and 1.1:1, respectively. We include repurchase agreements and securitized debt in the numerator of our debt-to-equity ratio and stockholders' equity as the denominator.

We do not manage our portfolio to have a pre-designated amount of borrowings at quarter-end or year-end. Our borrowings at period end are a snapshot of borrowing as of a date, and this number should be expected to differ from average borrowings over the period. Our borrowings will change as we implement our portfolio and risk management strategies to address changing market conditions by increasing or decreasing leverage. Our borrowings may change during periods when we raise capital, and in certain instances we may purchase additional assets and increase borrowings prior to an expected capital raise. Since our average borrowings and period end borrowings can be expected to differ, we believe our average borrowings during a period provides a more accurate representation of our exposure to the risks associated with leverage.

Stockholders' Equity

On January 28, 2011, we entered into an equity distribution agreement with FIDAC and UBS Securities LLC, or UBS. Through this agreement, we may sell through UBS, as our sales agent, up to 125,000,000 shares of our common stock in ordinary brokers' transactions at market prices or other transactions as agreed between us and UBS. We did not sell any shares of our common stock under the equity distribution agreement during the three and six month periods ended June 30, 2013 or 2012.

On September 24, 2009, we implemented a Dividend Reinvestment and Share Purchase Plan, or DRSP. The DRSP provided holders of record of our common stock an opportunity to automatically reinvest all or a portion of their cash distributions received on common stock in additional shares of our common stock as well as to make optional cash payments to purchase shares of our common stock. The DRSP was administered by the Administrator, Computershare. The DRSP was suspended when we were no longer current on our filings beginning in the second quarter of 2012. During the quarter ended March 31, 2012 we raised \$117 thousand by issuing 39,000 shares through the DRSP.

As a result of our failure to file our SEC filings by the filing date required by the SEC (including the grace period permitted by Rule 12b-25 under the Securities Exchange Act of 1934, as amended), we will not be able to issue shares of our common stock under the equity distribution agreement or DRSP until filings with the SEC have been timely made for a full year.

During the three month period ended June 30, 2013 we declared dividends to common shareholders totaling \$92.4 million, or \$0.09 per share. During the three month period ended June 30, 2012, we declared dividends to common shareholders totaling \$92.4 million, or \$0.09 per share.

During the six month period ended June 30, 2013 we declared dividends to common shareholders totaling \$184.9 million, or \$0.18 per share. During the six month period ended June 30, 2012, we declared dividends to common shareholders totaling \$205.4 million, or \$0.20 per share.

The Board of Directors declared and paid a regular quarterly dividend of \$0.09 per share for the third and fourth quarters of 2013. The Board of Directors has determined that there will be a regular quarterly dividend of \$0.09 per share for each of the first two quarters of 2014. The Board of Directors will review this program after the conclusion of the second quarter of 2014. The Board of Directors also declared and paid a special dividend of \$0.20 per share payable on January 31, 2014 to shareholders of record on January 8, 2014.

There was no preferred stock issued or outstanding as of June 30, 2012 and December 31, 2012.

Related Party Transactions Management Agreement

On November 15, 2007 we entered into a management agreement with FIDAC, pursuant to which FIDAC is entitled to receive a management fee and, in certain circumstances, a termination fee and reimbursement of certain expenses as described in the management agreement. The management fee and expenses do not have fixed and determinable payments and the termination fee is no longer applicable.

The Management Agreement

On November 15, 2007 we entered into a management agreement with FIDAC, which provided for an initial term through December 31, 2010 with an automatic one-year extension option and subject to certain termination rights. The Compensation Committee of the Board of Directors renewed the management agreement through December 31, 2013. In 2011 and 2010, we paid to our Manager a quarterly management fee equal to 1.50% per annum of our gross Stockholders' Equity (as defined in the management agreement). Effective November 28, 2012, the management fee was reduced to 0.75% per annum of gross Stockholders' Equity, which reduction will remain in effect until we are current on all of our filings required under applicable securities laws.

We are obligated to reimburse our Manager for its costs incurred under the management agreement. In addition, the management agreement permits our Manager to require us to pay for its pro rata portion of rent, telephone, utilities, office furniture, equipment, machinery and other office, internal and overhead expenses that our Manager incurred in connection with our operations. These expenses are allocated between our Manager and us based on the ratio of the proportion of gross assets compared to the gross assets managed by our Manager as calculated at each quarter end. Together we will modify this allocation methodology, subject to the approval of our board of directors if the allocation becomes inequitable (i.e., if we become very highly leveraged compared to our Manager's other funds and accounts).

March 2013 Amendment to Management Agreement

On March 8, 2013 we amended the management agreement. In the amendment, we memorialized the reduction in the management fee. Additionally, our Manager agreed to pay all past and future expenses that we and/or our Audit Committee incur to: (1) evaluate our accounting policy related to the application of GAAP to our Non-Agency RMBS portfolio (the Evaluation); (2) restate our financial statements for the period covering 2008 through 2011 as a result of the Evaluation (the Restatement Filing); and (3) investigate and evaluate any shareholder derivative demands arising from the Evaluation and/or the Restatement Filing (the Investigation); provided, however, that our Manager's obligation to pay expenses applies only to expenses not paid by our insurers under our insurance policies. Expenses shall include, without limitation, fees and costs incurred with respect to auditors, outside counsel, and consultants engaged by us and/or our Audit Committee for the Evaluation, Restatement Filing and the Investigation.

The amendment also provides that the independent directors or the holders of a majority of the outstanding shares of common stock (other than those held by Annaly or its affiliates) may elect to terminate the management agreement upon 30 days notice at any time in their sole discretion without the payment of a termination fee. Additionally, we may terminate the management agreement effective immediately if (i) our Manager engages in any act of fraud, misappropriation of funds, or embezzlement against the us, (ii) there is an event of any gross negligence on the part of our Manager in the performance of its duties under the management agreement, (iii) there is a commencement of any proceeding relating to our Manager's bankruptcy or insolvency, (iv) there is a dissolution of our Manager, or (v) our Manager is convicted of (including a plea of nolo contendere) a felony.

Fees Paid Under the Management Agreement

For the three months ended June 30, 2013 and 2012, our Manager earned management fees of \$6.5 million and \$12.9 million, respectively and received expense reimbursement of \$129 thousand and \$125 thousand, respectively. For the six months ended June 30, 2013 and 2012, our Manager earned management fees of \$12.9 million and \$25.8 million, respectively and received expense reimbursement of \$228 thousand and \$240 thousand, respectively. From our inception through 2009, our Manager waived its right to require us to pay our pro rata portion of rent, telephone, utilities, office furniture, equipment, machinery and other office, internal and overhead expenses of our Manager and its affiliates required for our operations.

Our Manager uses the proceeds from its management fee in part to pay compensation to its officers and employees who, notwithstanding that certain of them also are our officers, receive no cash compensation directly from us.

Clearing Fees

On March 1, 2011, we entered into an administrative services agreement with RCap Securities, Inc., or RCap. We use RCap, a SEC registered broker-dealer and a wholly-owned subsidiary of Annaly, to clear trades for us and RCap is paid customary fees in return for such services. RCap may also provide brokerage services to us from time to time. During the three month periods ended June 30, 2013 and 2012, fees paid to RCap were \$35 thousand and \$29 thousand, respectively. During the six month periods ended June 30, 2013 and 2012, fees paid to RCap were \$69 thousand and \$73 thousand, respectively.

Restricted Stock Grants

We granted 1,301,000 shares of restricted stock to employees of our Manager and its affiliates and members of our board of directors on January 2, 2008. During the three month period ended June 30, 2013 and 2012, 27,000 and 31,600 shares of restricted stock vested, respectively. Of those vested shares 2,000 and 200 shares were forfeited, respectively. During the six month period ended June 30, 2013 and 2012, 54,000 and 63,200 shares of restricted stock vested, respectively. Of those vested shares 4,000 and 400 shares were forfeited, respectively. At June 30, 2013 and 2012 there were approximately 527,000 and 695,000 unvested shares of restricted stock issued to employees of FIDAC, respectively. For the three months ended June 30, 2013 and 2012, compensation expense associated with the amortization of the fair value of the restricted stock was approximately \$94 thousand and \$88 thousand, respectively. For the six months ended June 30, 2013 and 2012, compensation expense associated with the amortization of the fair value of the restricted stock was approximately \$172 thousand and \$169 thousand, respectively.

Contractual Obligations and Commitments

The following tables summarize our contractual obligations at June 30, 2013 and December 31, 2012. The estimated principal repayment schedule of the securitized debt is based on expected cash flows of the residential mortgage loans or RMBS, as adjusted for expected principal writedowns on the underlying collateral of the debt.

June 30, 2013

Contractual Obligations	Within One Year	One to Three Years	Three to Five Years	Greater Than or Equal to Five Years	Total
	(dollars in thousands)				
Repurchase agreements for RMBS	\$ 1,478,141	\$ -	\$ -	\$ -	\$ 1,478,141
Securitized debt	511,814	640,811	327,256	380,786	1,860,667
Interest expense on RMBS repurchase agreements (1)	2,381	-	-	-	2,381

(1) Interest is based on variable rates in effect as of December 31, 2012.

Off-Balance Sheet Arrangements

We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities nor do we have any commitment or intent to provide funding to any such entities.

Capital Requirements

At June 30, 2013 and December 31, 2012, we had no material commitments for capital expenditures.

Dividends

To qualify as a REIT, we must pay annual dividends to our stockholders of at least 90% of our REIT taxable income (subject to certain adjustments). We intend to pay regular quarterly dividends to our stockholders that constitute all of our REIT taxable income. Before we pay any dividend, we must first meet any operating requirements and scheduled debt service on our financing facilities and other debt payable.

Inflation

A significant portion of our assets and liabilities are interest rate sensitive in nature. As a result, interest rates and other factors influence our performance far more so than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our consolidated financial statements are prepared in accordance with GAAP and our distributions will be determined by our board of directors consistent with our obligation to distribute to our stockholders at least 90% of our REIT taxable income on an annual basis in order to maintain our REIT qualification; in each case, our activities and financial condition are measured with reference to historical cost and/or fair market value without considering inflation.

Other Matters

We at all times intend to conduct our business so as not to become regulated as an investment company under the 1940 Act. If we were to become regulated as an investment company, our ability to use leverage would be substantially reduced.

Section 3(a)(1)(C) of the Investment Company Act defines an investment company as any issuer that is engaged or proposes to engage in the business of investing, reinvesting, owning, holding or trading in securities and owns or proposes to acquire investment securities having a value exceeding 40% of the value of the issuer's total assets (exclusive of U.S. Government securities and cash items) on an unconsolidated basis (the "40% test"). Excluded from the term "investment securities," among other things, are securities issued by majority-owned subsidiaries that rely on the exemption from registration provided by Section 3(c)(5)(C) of the Investment Company Act.

Certain of our subsidiaries, including Chimera Asset Holding LLC and certain subsidiaries that we may form in the future, rely on the exemption from registration provided by Section 3(c)(5)(C) of the Investment Company Act. Section 3(c)(5)(C), as interpreted by the staff of the Securities and Exchange Commission (or the SEC), requires us to invest at least 55% of our assets in "mortgages and other liens on and interest in real estate" (or Qualifying Real Estate Assets) and at least 80% of our assets in Qualifying Real Estate Assets plus real estate related assets. The assets that we acquire, therefore, are limited by the provisions of and the rules and regulations promulgated under the Investment Company Act.

On August 31, 2011, the SEC issued a concept release titled "Companies Engaged in the Business of Acquiring Mortgages and Mortgage-Related Instruments" (SEC Release No. IC-29778). Under the concept release, the SEC is reviewing interpretive issues related to the Section 3(c)(5)(C) exemption. We are monitoring developments related to this matter.

Based on our calculations, as of June 30, 2013 and 2012, we were in compliance with the exemption from registration provided by Section 3(c)(5)(C) and 3(a)(1)(C) of the Investment Company Act.

As a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, the U.S. Commodity Futures Trading Commission, or CFTC, gained jurisdiction over the regulation of interest rate swaps. The CFTC has asserted that this causes the operators of mortgage real estate investment trusts that use swaps as part of their business model to fall within the statutory definition of Commodity Pool Operator, or CPO, and, absent relief from the Division or the Commission, to register as CPOs. On December 7, 2012, as a result of numerous requests for no-action relief from the CPO registration requirement for operators of mortgage real estate investment trusts, the Division of Swap Dealer and Intermediary Oversight of the CFTC issued no-action relief entitled "No-Action Relief from the Commodity Pool Operator Registration Requirement for Commodity Pool Operators of Certain Pooled Investment Vehicles Organized as Mortgage Real Estate Investment Trusts" that permits a CPO to receive relief by filing a claim to perfect the use of the relief. A claim submitted by a CPO will be effective upon filing, so long as the claim is materially complete. The conditions that must be met to claim the relief are that the mortgage real estate investment trust must:

- Limit the initial margin and premiums required to establish its commodity interest positions to no more than five percent of the fair market value of the mortgage real estate investment trust's total assets;
- Limit the net income derived annually from its commodity interest positions that are not qualifying hedging transactions to less than five percent of the mortgage real estate investment trust's gross income;
- Ensure that interests in the mortgage real estate investment trust are not marketed to the public as or in a commodity pool or otherwise as or in a vehicle for trading in the commodity futures, commodity options, or swaps markets; and
- Either:
 - o identify itself as a "mortgage REIT" in Item G of its last U.S. income tax return on Form 1120-REIT; or
 - o if it has not yet filed its first U.S. income tax return on Form 1120-REIT, disclose to its shareholders that it intends to identify itself as a "mortgage REIT" in its first U.S. income tax return on Form 1120-REIT.

While we disagree that the CFTC's position that mortgage real estate investment trusts that use swaps as part of their business model fall within the statutory definition of a CPO, we have submitted a claim for the relief set forth in the no-action relief entitled "No-Action Relief from the Commodity Pool Operator Registration Requirement for Commodity Pool Operators of Certain Pooled Investment Vehicles Organized as Mortgage Real Estate Investment Trusts" and believe we meet the criteria for such relief set forth therein.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The primary components of our market risk are related to credit risk, interest rate risk, prepayment risk, market value risk and real estate risk. While we do not seek to avoid risk completely, we believe the risk can be quantified from historical experience and we seek to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Credit Risk

We are subject to credit risk in connection with our investments in Non-Agency RMBS and residential whole loans and face more credit risk on assets we own which are rated below “AAA”. The credit risk related to these investments pertains to the ability and willingness of the borrowers to pay, which is assessed before credit is granted or renewed and periodically reviewed throughout the loan or security term. We believe that residual loan credit quality, and thus the quality of our assets, is primarily determined by the borrowers’ credit profiles and loan characteristics. We use a comprehensive credit review process. Our analysis of loans includes borrower profiles, as well as valuation and appraisal data. We use compensating factors such as liquid assets, low loan to value ratios and regional unemployment statistics in evaluating loans. Our resources include a proprietary portfolio management system, as well as third party software systems. We may utilize a third party due diligence firm to perform an independent underwriting review to ensure compliance with existing guidelines. In addition to statistical sampling techniques, we create adverse credit and valuation samples, which we individually review. We reject loans that fail to conform to our standards and do not meet our underwriting criteria. Once we own a loan, our surveillance process includes ongoing analysis through our proprietary data and servicer files. Additionally, the Non-Agency RMBS and other ABS which we acquire for our portfolio are reviewed by us to ensure that they satisfy our risk based criteria. Our review of Non-Agency RMBS and other ABS includes utilizing a proprietary portfolio management system. Our review of Non-Agency RMBS and other ABS is based on quantitative and qualitative analysis of the risk-adjusted returns on Non-Agency RMBS and other ABS. This analysis includes an evaluation of the collateral characteristics supporting the RMBS such as borrower payment history, credit profiles, geographic concentrations, credit enhancement, seasoning, and other pertinent factors.

Interest Rate Risk

Interest rate risk is highly sensitive to many factors, including governmental, monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. We are subject to interest rate risk in connection with our investments and our related debt obligations, which are generally repurchase agreements, warehouse facilities and securitization/re-securitization vehicles. Our repurchase agreements and warehouse facilities may be of limited duration that are periodically refinanced at current market rates. We intend to mitigate this risk through utilization of derivative contracts, primarily interest rate swap agreements, swaptions, futures and mortgage options.

Interest Rate Effects on Net Interest Income

Our operating results depend, in large part, on differences between the income from our investments and our borrowing costs. Most of our warehouse facilities and repurchase agreements provide financing based on a floating rate of interest calculated on a fixed spread over LIBOR. The fixed spread varies depending on the type of underlying asset which collateralizes the financing. Accordingly, the portion of our portfolio which consists of floating interest rate assets will be match-funded utilizing our expected sources of short-term financing, while our fixed interest rate assets will not be match-funded. During periods of rising interest rates, the borrowing costs associated with our investments tend to increase while the income earned on our fixed interest rate investments may remain substantially unchanged. This will result in a narrowing of the net interest spread between the related assets and borrowings and may even result in losses. Further, during this portion of the interest rate and credit cycles, defaults could increase and result in credit losses to us, which could adversely affect our liquidity and operating results. Such delinquencies or defaults could also have an adverse effect on the spread between interest-earning assets and interest-bearing liabilities. Hedging techniques are partly based on assumed levels of prepayments of our fixed-rate and hybrid adjustable-rate mortgage loans and RMBS. If prepayments are slower or faster than assumed, the life of the mortgage loans and RMBS will be longer or shorter, which would reduce the effectiveness of any hedging strategies we may use and may cause losses on such transactions.

Interest Rate Effects on Fair Value

Another component of interest rate risk is the effect changes in interest rates will have on the fair value of the assets we acquire. We face the risk that the fair value of our assets will increase or decrease at different rates than that of our liabilities, including our hedging instruments. We primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration essentially measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

It is important to note that the impact of changing interest rates on fair value can change significantly when interest rates change beyond 100 basis points from current levels. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change beyond 100 basis points. In addition, other factors impact the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, in the event of changes in actual interest rates, the change in the fair value of our assets would likely differ from that shown below and such difference might be material and adverse to our stockholders.

Interest Rate Cap Risk

We also invest in adjustable-rate mortgage loans and RMBS. These are mortgages or RMBS in which the underlying mortgages are typically subject to periodic and lifetime interest rate caps and floors, which limit the amount by which the security's interest yield may change during any given period. However, our borrowing costs pursuant to our financing agreements will not be subject to similar restrictions. Therefore, in a period of increasing interest rates, interest rate costs on our borrowings could increase without limitation by caps, while the interest-rate yields on our adjustable-rate mortgage loans and RMBS would effectively be limited. This problem will be magnified to the extent we acquire adjustable-rate RMBS that are not based on mortgages which are fully indexed. In addition, the mortgages or the underlying mortgages in an RMBS may be subject to periodic payment caps that result in some portion of the interest being deferred and added to the principal outstanding. This could result in our receipt of less cash income on our adjustable-rate mortgages or RMBS than we need in order to pay the interest cost on our related borrowings. These factors could lower our net interest income or cause a net loss during periods of rising interest rates, which would harm our financial condition, cash flows and results of operations.

Interest Rate Mismatch Risk

We fund a substantial portion of our acquisitions of RMBS with borrowings that, after the effect of hedging, have interest rates based on indices and re-pricing terms similar to, but of somewhat shorter maturities than, the interest rate indices and re-pricing terms of the mortgages and RMBS. In most cases the interest rate indices and re-pricing terms of our mortgage assets and our funding sources will not be identical, thereby creating an interest rate mismatch between assets and liabilities. Our cost of funds would likely rise or fall more quickly than would our earnings rate on assets. During periods of changing interest rates, such interest rate mismatches could negatively impact our financial condition, cash flows and results of operations. To mitigate interest rate mismatches, we may utilize the hedging strategies discussed above. Our analysis of risks is based on FIDAC's experience, estimates, models and assumptions. These analyses rely on models which utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our management may produce results that differ significantly from the estimates and assumptions used in our models and the projected results shown in this Form 10-Q.

Our profitability and the value of our portfolio (including interest rate swaps) may be adversely affected during any period as a result of changing interest rates. The following table quantifies the potential changes in net interest income and portfolio value for our Agency RMBS portfolio should interest rates go up or down 25, 50, and 75 basis points, assuming parallel movements in the yield curves. All changes in income and value are measured as percentage changes from the projected net interest income and portfolio value at the base interest rate scenario. The base interest rate scenario assumes interest rates at June 30, 2013 and various estimates regarding prepayment and all activities are made at each level of rate change. Actual results could differ significantly from these estimates.

June 30, 2013

Change in Interest Rate	Projected Percentage Change in Net Interest Income (1)	Projected Percentage Change in Portfolio Value, with Effect of Interest Rate Swaps and Other Hedging Transactions (2)
-75 Basis Points	(11.58%)	1.15%
-50 Basis Points	(9.16%)	0.86%
-25 Basis Points	(5.35%)	0.50%
Base Interest Rate	-	-
+25 Basis Points	4.73%	(0.61%)
+50 Basis Points	8.60%	(1.30%)
+75 Basis Points	11.49%	(2.09%)

(1) Change in annual economic net interest income. Includes interest expense on interest rate swaps.

(2) Projected Percentage Change in Portfolio Value is based on instantaneous moves in interest rates.

Prepayment Risk

As we receive prepayments of principal on these investments, premiums and discounts on such investments will be amortized or accreted into interest income. In general, an increase in prepayment rates will accelerate the amortization of purchase premiums, thereby reducing the interest income earned on the investments. Conversely, discounts on such investments are accelerated and accreted into interest income increasing interest income.

Extension Risk

Our Manager computes the projected weighted-average life of our investments based on assumptions regarding the rate at which the borrowers will prepay the underlying mortgages. In general, when fixed-rate or hybrid adjustable-rate mortgage loans or RMBS are acquired via borrowings, we may, but are not required to, enter into an interest rate swap agreement or other hedging instrument that effectively fixes our borrowing costs for a period close to the anticipated average life of the fixed-rate portion of the related assets. This strategy is designed to protect us from rising interest rates as the borrowing costs are effectively fixed for the duration of the fixed-rate portion of the related assets. However, if prepayment rates decrease in a rising interest rate environment, the life of the fixed-rate portion of the related assets could extend beyond the term of the swap agreement or other hedging instrument. This could have a negative impact on our results from operations, as borrowing costs would no longer be fixed after the end of the hedging instrument while the income earned on the fixed and hybrid adjustable-rate assets would remain fixed. In extreme situations, we may be forced to sell assets to maintain adequate liquidity, which could cause us to incur losses.

Basis Risk

We seek to limit our interest rate risk by hedging portions of our portfolio through interest rate swaps and other types of hedging instruments. Interest rate swaps are generally tied to underlying Treasury benchmark interest rates. Basis risk relates to the risk of the spread between our RMBS and underlying hedges widening. Such a widening may cause a decline in the fair value of our RMBS that is greater than the increase in fair value of our hedges resulting in a net decline in book value. The widening of mortgage-backed securities yields and Treasury benchmark interest rates may result from a variety of factors such as anticipated or actual monetary policy actions or other market factors.

Market Risk

Market Value Risk

Our available-for-sale securities are reflected at their estimated fair value with unrealized gains and losses excluded from earnings and reported in other comprehensive income if no OTTI has been recognized in earnings. The estimated fair value of these securities fluctuates primarily due to changes in interest rates, prepayment speeds, market liquidity, credit quality, and other factors. Generally, in a rising interest rate environment, the estimated fair value of these securities would be expected to decrease; conversely, in a decreasing interest rate environment, the estimated fair value of these securities would be expected to increase. As market volatility increases or liquidity decreases, the fair value of our investments may be adversely impacted.

Real Estate Market Risk

We own assets secured by real property and may own real property directly in the future. Residential property values are subject to volatility and may be affected adversely by a number of factors, including, but not limited to, national, regional and local economic conditions (which may be adversely affected by industry slowdowns and other factors); local real estate conditions (such as an oversupply of housing); changes or continued weakness in specific industry segments; construction quality, age and design; demographic factors; and retroactive changes to building or similar codes. In addition, decreases in property values reduce the value of the collateral and the potential proceeds available to a borrower to repay our loans, which could also cause us to incur losses.

Risk Management

To the extent consistent with maintaining our REIT status, we seek to manage risk exposure to protect our portfolio of residential mortgage loans, RMBS, and other assets and related debt against the effects of major interest rate changes. We generally seek to manage risk by:

- monitoring and adjusting, if necessary, the reset index and interest rate related to our RMBS and our financings;
- attempting to structure our financing agreements to have a range of different maturities, terms, amortizations and interest rate adjustment periods;
- using derivatives, financial futures, swaps, options, caps, floors and forward sales to adjust the interest rate sensitivity of our investments and our borrowings;
- using securitization financing to lower average cost of funds relative to short-term financing vehicles further allowing us to receive the benefit of attractive terms for an extended period of time in contrast to short term financing and maturity dates of the investments not included in the securitization; and
- actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of our investments and the interest rate indices and adjustment periods of our financings.

Our efforts to manage our assets and liabilities are concerned with the timing and magnitude of the re-pricing of assets and liabilities. We attempt to control risks associated with interest rate movements. Methods for evaluating interest rate risk include an analysis of our interest rate sensitivity “gap”, which is the difference between interest-earning assets and interest-bearing liabilities maturing or re-pricing within a given time period. A gap is considered positive when the amount of interest-rate sensitive assets exceeds the amount of interest-rate sensitive liabilities. A gap is considered negative when the amount of interest-rate sensitive liabilities exceeds interest-rate sensitive assets. During a period of rising interest rates, a negative gap would tend to adversely affect net interest income, while a positive gap would tend to result in an increase in net interest income. During a period of falling interest rates, a negative gap would tend to result in an increase in net interest income, while a positive gap would tend to affect net interest income adversely. Because different types of assets and liabilities with the same or similar maturities may react differently to changes in overall market rates or conditions, changes in interest rates may affect net interest income positively or negatively even if an institution were perfectly matched in each maturity category.

The following table sets forth the estimated maturity or re-pricing of our interest-earning assets and interest-bearing liabilities at June 30, 2013. The amounts of assets and liabilities shown within a particular period were determined in accordance with the contractual terms of the assets and liabilities, except adjustable-rate loans, and securities are included in the period in which their interest rates are first scheduled to adjust and not in the period in which they mature and includes the effect of the interest rate swaps. The interest rate sensitivity of our assets and liabilities in the table could vary substantially based on actual prepayments.

June 30, 2013
(dollars in thousands)

	Within 3 Months	3-12 Months	1 Year to 3 Years	Greater than 3 Years	Total
Rate sensitive assets	\$ 2,463,012	\$ 1,778,194	\$ 921,777	\$ 8,509,027	\$ 13,672,010

Cumulative interest rate sensitivity gap as a percentage of total rate sensitive assets	18%	27%	33%	85%	

Our analysis of risks is based on our manager's experience, estimates, models and assumptions. These analyses rely on models which utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our manager may produce results that differ significantly from the estimates and assumptions used in our models and the projected results shown in the above tables and in this Form 10-Q. These analyses contain certain forward-looking statements and are subject to the safe harbor statement set forth under the heading, "Special Note Regarding Forward-Looking Statements."

ITEM 4. Controls and Procedures

Changes in Internal Controls

In our Annual Report on Form 10-K for the year ended December 31, 2012, we disclosed that management had identified material weaknesses in our internal controls over financial reporting. As of December 31, 2012, we determined that our resources and level of technical accounting expertise within the accounting function were insufficient to properly evaluate and account for the complexity of our investments in Non-Agency RMBS securities, IO strips, impairment of securitized loans held for investment, effective interest calculations and related disclosures in accordance with generally accepted accounting principles. We did not design and maintain adequate procedures or effective review and approval controls, including the review of journal entries and reconciliations, over routine processes. We did not design and maintain adequate review and approval controls over significant estimates and their related disclosure process to prevent or detect a material misstatement and we identified an overreliance on spreadsheets consisting of manual inputs and complex calculations used to record transactions and estimates supporting the financial statement amounts and disclosures.

Management is committed to the ongoing remediation efforts to address the material weaknesses as well as other identified areas of risk. These remediation efforts, summarized below, which are either implemented or in process, are intended to both address the identified material weaknesses and to enhance our overall financial control environment.

After the issuance of the interim financial statements for the third quarter of 2011, our management met more frequently with the Audit Committee of the Company's Board of Directors. The Audit Committee, assisted by independent legal counsel and outside accounting experts engaged by its counsel, has initiated an internal investigation into the facts and circumstances leading to the restatement of the Company's financial statements and will make recommendations for appropriate remedial measures based on its findings. This investigation is ongoing and the Audit Committee has not presented a final recommendation to the Board of Directors.

The Company engaged a leading accounting firm to advise management with respect to accounting standards research support and engaged a leading professional services organization specializing in accounting and reporting matters to aid management with key facets of the material weaknesses in our internal controls over financial reporting. During 2012 and 2013, we added resources in accounting policy, middle office and financial reporting roles, including technical accounting subject matter resources and a new Chief Financial Officer. We believe the additional resources have remediated the material weakness described in the 2011 Form 10-K regarding our resources and level of technical accounting expertise within the accounting function to properly evaluate and account for the complexity of the Company's investments in Non-Agency RMBS securities, IO strips, impairment of securitized loans held for investment, and related disclosures in accordance with generally accepted accounting principles.

Additionally, we have added resources and updated processes to remediate the aforementioned material weakness regarding the direct independent review and validation of inputs used in significant estimates such as the determination of the fair value, impairment, or interest income related to our investments in RMBS and securitized loans held for investment, including the formalization of a middle office function. We engaged two independent pricing services to test and validate the models we use to value our portfolio. The new resources and processes were implemented in 2013.

Further, expanding the accounting policy, middle office and financial reporting group has increased the opportunity to further segregate duties, add additional review steps, improve the technical competency of the accounting function and improve our control environment. We believe these resources will provide improved documentation and evidence of review of the schedules supporting the amounts and disclosures in the consolidated financial statements.

Based upon the substantial work described above and the procedures performed through the filing of this Form 10-Q, we have concluded that the consolidated financial statements for the periods covered by and included in this Form 10-Q are prepared in accordance with GAAP and fairly present in all material respects, our financial position, results of operation and cash flows for each of the periods presented herein.

Our Chief Executive Officer and Chief Financial Officer determined that the aforementioned material weaknesses in our internal controls over financial reporting were not fully remediated and that our disclosure controls and procedures were not effective as of June 30, 2013.

Other than the changes discussed above, there have been no changes in our “internal control over financial reporting” (as defined in Rule 13a-15 (f) under the Securities Exchange Act of 1934, as amended) that occurred during the period covered by this quarterly report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. Other Information

Item 1. Legal Proceedings

After the issuance of the interim financial statements for the third quarter of 2011, the Audit Committee of our Board of Directors initiated an internal investigation, with the assistance of outside counsel and financial advisors engaged by outside counsel, regarding the facts and circumstances relating to our accounting for Non-Agency RMBS and the restatement of our financial statements. This investigation is ongoing.

Our Board of Directors has received three derivative demand letters alleging, among other things, that the directors and our officers, as well as our Manager, FIDAC, breached their fiduciary duties to us by failing to institute adequate internal controls and failing to ensure that we made accurate financial disclosures. These letters request, among other things, that the Board of Directors take action to investigate and remedy the alleged breaches of fiduciary duty. At the conclusion of its investigation, the Audit Committee will make final recommendations to the Board of Directors about an appropriate response to the letters. The Audit Committee currently expects to conclude its investigation at the same time as the Company files its Annual Report on Form 10-K for the year ended December 31, 2013. These and other potential actions that may be filed against us, whether with or without merit, may divert the attention of management from our business, harm our reputation and otherwise may have a material adverse effect on our business, financial condition, results of operations and cash flows.

Item 1A. Risk Factors

Under “Part I — Item 1A — Risk Factors” of our Form 10-K for the year ended December 31, 2012, we set forth risk factors related to (i) risks associated with the restatement of our financial statements and related matters, (ii) risks associated with adverse developments in the mortgage finance and credit markets, (iii) risks associated with our management and relationship with our Manager, (iv) risks related to our business, (v) risks related to our investments, (vi) regulatory and legal risks, (vii) risks related to our common stock, and (viii) tax risks. You should carefully consider the risk factors set forth in our Form 10-K for the year ended December 31, 2012. As of the date hereof, there have been no material changes to the risk factors set forth in our Form 10-K for the year ended December 31, 2012.

Item 6. Exhibits

Exhibits:

The exhibits required by this item are set forth on the Exhibit Index attached hereto

EXHIBIT INDEX

Exhibit Number	Description
3.1	Articles of Amendment and Restatement of Chimera Investment Corporation (filed as Exhibit 3.1 to the Company's Registration Statement on Amendment No. 1 to Form S-11 (File No. 333-145525) filed on September 27, 2007 and incorporated herein by reference).
3.2	Articles of Amendment of Chimera Investment Corporation (filed as Exhibit 3.1 to the Company's Report on Form 8-K filed on May 28, 2009 and incorporated herein by reference)
3.3	Articles of Amendment of Chimera Investment Corporation (filed as Exhibit 3.1 to the Company's Report on Form 8-K filed on November 5, 2010 and incorporated herein by reference).
3.4	Amended and Restated Bylaws of Chimera Investment Corporation (filed as Exhibit 3.2 to the Company's Registration Statement on Amendment No. 2 to Form S-11 (File No. 333-145525) filed on November 5, 2007 and incorporated herein by reference).
4.1	Specimen Common Stock Certificate of Chimera Investment Corporation (filed as Exhibit 4.1 to the Company's Registration Statement on Amendment No. 1 to Form S-11 (File No. 333-145525) filed on September 27, 2007 and incorporated herein by reference).
31.1	Certification of Matthew Lambiase, Chief Executive Officer and President of the Registrant, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Rob Colligan, Chief Financial Officer of the Registrant, pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1	Certification of Matthew Lambiase, Chief Executive Officer and President of the Registrant, pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification of Rob Colligan, Chief Financial Officer of the Registrant, pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

and principal financial officer of the registrant)

Date: March 20, 2014

CERTIFICATIONS

I, Matthew Lambiase, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Chimera Investment Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) for the registrant and have:
 - a. Designed such disclosure controls and procedures or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal controls over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

**PURSUANT TO SECTION 906 OF THE
SARBANES-OXLEY ACT OF 2002, 18 U.S.C. SECTION 1350**

In connection with the quarterly report on Form 10-Q of Chimera Investment Corporation (the "Company") for the period ended June 30, 2013 to be filed with Securities and Exchange Commission on or about the date hereof (the "Report"), I, Matthew Lambiase, President, and Chief Executive Officer of the Company, certify, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350, that:

1. The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2. The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company at the dates of, and for the periods covered by, the Report.

It is not intended that this statement be deemed to be filed for purposes of the Securities Exchange Act of 1934.
